Dear Earth, take Care! Erich Schröder,2021-05-09 Can humanity still control climate change Do we have to apologize to our grandchildren Why are politicians failing in this crisis This book is not a scientific treatise on climate change and other environmental problems Rather it is a very personal reflection on the current situation of people on Earth inspired by news and discussions from print media TV and books from 2020 and the first quarter of 2021 The author a physician engineer and political journalist sees humanity as technically and intellectually capable of solving our actual and urgent environmental problems In terms of implementation he recognizes some positive efforts and trends but also a political inability of the world community to initiate solutions together His appeal and proposal are for a pragmatic approach by politicians to avert the impending catastrophe for humanity

*Once Saved, Always Saved?* Vicente Rangel,2017-06-19 Once saved always saved Many Christians believe that you cant lose your salvation while another group believes that there is a possibility that it can be lost In the evangelic groups this topic has cause a lot of controversy But above all things the most important is what the Bible says because it is Gods Holy Word But if all of these groups quote the scriptures to prove the truth who should we believe then Pastor Vicente Rangel explains this topic with clarity quoting the scriptures that both of these groups support He also explains how through the years the scriptures of the Bible that are related to this topic have been wrongly interpreted not because of their ignorance but because of their disbelief They have ignored the warnings and conditions that God gave us through his Holy Bible He wrote them to call our attention but nowadays many Christians have made freedom in Christ living a sinful and immoral life abusing the goodness of God and believing that we can live our lives however we want to without losing our salvation
