The Healing Blade A Tale Of Neurosurgery:

The Healing Blade Edward J. Sylvester, 1997 This book traces the efforts of one of the world's top neurosurgical teams to understand the human brain in ever deeper ways. Its dramatic focus is a state called the standstill where the patient has no breath, no heartbeat, no blood flow, no viable temperature, and no brain waves or other activity that clinically define life. In *The Healing Blade*, patients are taken down to death itself and brought back again. [Brain Surgeons](#) Diane Bailey, 2008-08-15 Describes the job of brain surgeon, the role of the surgeon in medicine, and the training necessary to be a brain surgeon.

Becoming a Neurosurgeon John Colapinto, 2019-04-02 A fascinating guide to a career in neurosurgery written by award-winning journalist John Colapinto and based on the real-life experiences of an expert in the field. Essential reading for someone considering a path to this most challenging profession. Choosing what to do with your life begins with imagining yourself in a career, actually meeting the emotional, physical, and intellectual demands of the job. Often regarded as one of the most technically and emotionally demanding of surgical disciplines, becoming a neurosurgeon requires years of study. This practical guide offers a unique opportunity to see what daily life for a neurosurgeon is like from someone who has mastered the profession and can explain what the risks and rewards of the job really are. Joshua Bederson is the chief of Neurosurgery at the esteemed Mt. Sinai Hospital in New York City. New Yorker writer John Colapinto brings to vivid life what Dr. Bederson's professional life is like, to show all the varied facets of his work from extensive study and research to brain operations, one-on-one consultations with patients, and even staff meetings with fellow surgeons and students. Since Mt. Sinai is a teaching hospital, we learn alongside the residents and interns how Bederson trains neurosurgeons, passing along the knowledge and skills he honed over decades. The result is a multidimensional portrait of a man and a department, a practical guide for how to enter and learn the profession, as well as a moving glimpse into the world of patients and doctors who face some of life's most harrowing challenges. **Princeton Alumni Weekly**, 1993 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1993 *Current Catalog* National Library of Medicine (U.S.), 1993 First multi-year cumulation covers six years 1965-70 **The Boston Globe Index**, 1993 [Neuroprotective Agents](#) William Slikker, Bruce Trembly, 2001 An international group of scientists in both clinical and basic research in neuroprotective agents examine the effects of and therapy for spinal cord injury, inflammatory responses in intracerebral hemorrhage, neurotoxicity, and genetic damage from amphetamine abuse, effects of marijuana abuse, cerebrovascular deficits, effects of and therapy for ischemic stroke, distribution of microglia in ageing brain, and after transgenic manipulation, preconditioning, gene induction for neuroprotection, interaction of genes and environment in the expression and treatment of autism in an animal model, pathology and pharmacology of spreading depression.
