The Hermetic Art The Teaching Concerning Atomic Transmutation:

The Hermetic Art Volpierre, Frater Albertus, 2005-12-01 This scarce antiquarian book is a facsimile reprint of the original. Due to its age it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving and promoting the world's literature in affordable, high-quality modern editions that are true to the original work. **The Hermetic Art** Nikolaus Bartschell, Volpierre, 1974 **The Hermetic Art** Nikolaus Bartschell, 1974 *Dictionary of Gnosis & Western Esotericism: A* Wouter J. Hanegraaff, Antoine Faivre, R. van den Broek, Jean-Pierre Brach, 2005 Covers every aspect of pagan, Jewish and Christian religious discourses and phenomena traditionally labeled: gnosticism, hermeticism, astrology, magic, the occult, sciences, esoteric religion and more. Contains articles about the life and work of all the major personalities in the history of Gnosis and Western Esotericism, discussing their ideas, significance and historical influence. *Creations of Fire* Cathy Cobb, Harold Goldwhite, 2013-11-11 The history of chemistry is a story of human endeavor and as erratic as human nature itself. Progress has been made in fits and starts and it has come from all parts of the globe. Because the scope of this history is considerable, some 100,000 years, it is necessary to impose some order and we have organized the text around three discernible albeit gross divisions of time. Part 1, Chaps 1-7, covers 100,000 B.C. to the late 1700s and presents the background of the Chemical Revolution. Part 2, Chaps 8-14, covers the late 1700s to World War I and presents the Chemical Revolution and its consequences. Part 3, Chaps 15-20, covers World War I to 1950 and presents the Quantum Revolution and its consequences and hints at revolutions to come. There have always been two tributaries to the chemical stream: experiment and theory. But systematic experimental methods were not routinely employed until the 1600s and quantitative theories did not evolve until the 1700s and it can be argued that modern chemistry as a science did not begin until the Chemical Revolution in the 1700s. xi xii PREFACE We argue, however, that the first experiments were performed by artisans and the first theories proposed by philosophers and that a revolution can be understood only in terms of what is being revolted against. **Report of the Conference** American Alumni Council, 1933 *Nature* Sir Norman Lockyer, 1928 **Olde Penn**, 1916 **Old Penn**, 1915 Report of the Conference (varies slightly) American Alumni Council, 1933 *The Hermetic Art* Albert Sidney Raleigh, 1919 **The Hermetic Tradition** Julius Evola, 2018-07-13 This important survey of alchemical symbols and doctrines sets forth the mysterious worldview and teachings of the practitioners of the royal art. One of the leading exponents of the Hermetic tradition, Julius Evola demonstrates the singularity of subject matter that lies behind the words of all adepts in all ages, showing how alchemy, often misunderstood as primitive chemistry or a mere template for the Jungian process of individuation, is nothing less than a universal secret science of human and natural transformation. First published in 1931 in Italian. This is the first English translation. Draws from a host of sources in the Western esoteric tradition, works on theurgy, magic and gnosticism from neoplatonic, Arab and medieval sources. A Short
