Christopher A. Cooper, H. Gibbs Knotts

The New Politics Of American Policy A Reader:

The New Politics of American Policy Edgar Litt, 1969 **The New Politics of American Trade** I. M. Destler, Peter J. Balint, 1999 Imports pour into the United States up by 79 percent in six years The trade deficit more than doubles The House of Representatives solidly rejects a bill that would liberalize global and regional trade and endorses import quotas for a major manufactured product by a two to one margin Although at first glance these events of the 1990s might sound like past chapters of US trade politics in fact the political dynamics have changed in significant ways As the impact of globalization comes into focus politically important constituencies have begun to resist trade liberalization Labor and environmental groups in particular demanding that their concerns be addressed have succeeded in fracturing the long standing bipartisan protrade coalition in Congress and in the process have undercut US leadership in liberalizing global trade This new study reexamines the landscape of trade politics It shows how trade advocates and labor and environmental skeptics differ significantly in both their substantive views and their political and organizational cultures The authors demonstrate how this new challenge differs from that of traditional trade protectionism likening it instead to the debate a century ago over whether and how to regulate American capitalism for social purposes The analysis leads to a set of recommendations aimed at constructive compromise and a new political foundation for US trade policy leadership

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

The New Politics of North Carolina Christopher A. Cooper, H. Gibbs Knotts, 2012-09-01 Political scientist V O Key in 1949 described North Carolina as a progressive plutocracy He argued that in the areas of industrial development public education and race relations North Carolina appeared progressive when compared to other southern states Reconsidering Key s evaluation nearly sixty years later contributors to this volume find North Carolina losing ground as a progressive leader in the South The new politics of the state involves a combination of new and

old new opportunities and challenges have forced the state to change but the old culture still remains a powerful force In the eleven essays collected here leading scholars of North Carolina politics offer a systematic analysis of North Carolina s politics and policy placed in the context of its own history as well as the politics and policies of other states Topics discussed include the evolution of politics and political institutions the roles of governors the judicial branch interest groups and party systems and the part played by economic development and environmental policy Contributors also address how geography affects politics within the state region and nation Designed with students and interested citizens in mind this collection provides an excellent introduction to contemporary North Carolina politics and government Contributors Hunter Bacot Elon University Christopher A Cooper Western Carolina University Thomas F Eamon East Carolina University Jack D Fleer Wake Forest University Dennis O Grady Appalachian State University Ferrel Guillory University of North Carolina at Chapel Hill Sean Hildebrand Western Carolina University Jonathan Kanipe Town Manager Catawba North Carolina H Gibbs Knotts Western Carolina University Adam J Newmark Appalachian State University Charles Prysby University of North Carolina at Greensboro Ruth Ann Strickland Appalachian State University James H Svava Arizona State University Timothy Vercellotti Rutgers University

The New Politics of Race Howard Winant,2004 The New Politics of Race brings together Winant s new and previously published essays to form a comprehensive picture of the origins and nature of the complex racial politics that engulf us today

The New Politics of Class Geoffrey Evans,James Tilley,2017 This book explores the new politics of class in 21st century Britain It shows how the changing shape of the class structure since 1945 has led political parties to change which has both reduced class voting and increased class non voting This argument is developed in three stages The first is to show that there has been enormous social continuity in class divisions The authors demonstrate this using extensive evidence on class and educational inequality perceptions of inequality identity and awareness and political attitudes over more than fifty years The second stage is to show that there has been enormous political change in response to changing class sizes Party policies politicians rhetoric and the social composition of political elites have radically altered Parties offer similar policies appeal less to specific classes and are populated by people from more similar backgrounds Simultaneously the mass media have stopped talking about the politics of class The third stage is to show that these political changes have had three major consequences First as Labour and the Conservatives became more similar class differences in party preferences disappeared Second new parties most notably UKIP have taken working class voters from the mainstream parties Third and most importantly the lack of choice offered by the mainstream parties has led to a huge increase in class based abstention from voting Working class people have become much less likely to vote In that sense Britain appears to have followed the US down a path of working class political exclusion ultimately undermining the representativeness of our democracy They conclude with a discussion of the Brexit referendum and the role that working class alienation played in its historic outcome

The Politics of American Economic Policy Making Paul Peretz,2016-09-16 A reader on American

government and the economy It contains wide ranging articles by people such as Richard Musgrave Milton Friedman James Buchanan and Alan Greenspan *The Politics of Justifying Force* Charlotte Peevers,2013-11 The potential engagement of British forces in military action often leads to intense public debate This book assesses the public legal justifications for such operations It critiques the idea that using international legal norms to justify decisions on the use of force will necessarily result in fewer instances of military intervention **Against the New Politics of Identity** Ronald A. Lindsay,2023-11-14 A far reaching cultural transformation is occurring across much of the West that is threatening the very foundations of democracy Individuals are no longer judged by their deeds actions and behavior but rather are defined by their race ethnicity and sexual orientation Driven largely by the political Left this transformation has led to the wholesale division of individuals into oppressed and oppressor classes Where the Left once organized around liberal principles to ensure that all groups had an equal seat at the proverbial table much of the Left today demands not only that those categorized as oppressed receive priority seating but also that those categorized as oppressor are excluded from the table altogether Government bodies corporations universities and the mainstream media regularly submit to these illiberal commands and explicitly favor certain identity groups over others in the name of allyship antiracism or equity As philosopher Ronald A Lindsay argues in *Against the New Politics of Identity* this radical cultural shift by which all policies and practices must be seen through the lens of identity rests on three dogmatic tenets those who are alleged to be oppressed or marginalized have special insight based on their lived experience racism is embedded in all Western laws regulations policies and institutions and equity understood as the elimination of all group disparities in all areas of life must take precedence over all other criteria such as individual merit achievement and need Lindsay demonstrates that these tenets are based on a series of fallacies and warns that the push for identity politics on the Left predictably elicits a parallel reaction from the Right including the Right's own version of identity politics in the form of Christian nationalism As he makes clear the symbiotic relationship that has formed between these two political poles risks producing even deeper threats to Enlightenment values and Western democracy If we are to preserve a liberal democracy in which the rights of individuals are respected he concludes the dogmas of identity politics must be challenged and refuted *Against the New Politics of Identity* offers a principled path for doing so *The Politics of Policy Change* Daniel Béland,2012-03-06 For generations debating the expansion or contraction of the American welfare state has produced some of the nation's most heated legislative battles Attempting social policy reform is both risky and complicated especially when it involves dealing with powerful vested interests sharp ideological disagreements and a nervous public *The Politics of Policy Change* compares and contrasts recent developments in three major federal policy areas in the United States welfare Medicare and Social Security Daniel B land and Alex Waddan argue that we should pay close attention to the role of ideas when explaining the motivations for and obstacles to policy change This insightful book concentrates on three cases of social policy reform or attempted reform that took place during the presidencies of Bill Clinton and George W Bush

Blanchard and Waddan further employ their framework to help explain the meaning of the 2010 health insurance reform and other developments that have taken place during the Obama presidency. The result is a book that will improve our understanding of the politics of policy change in contemporary federal politics.
