The New Us Strategic Debate:

The New U.S. Strategic Debate Ronald D. Asmus, 1993 Discusses how the old bipartisan consensus that placed containment and deterrence of the Soviet Union at the center of U S national security strategy has given way to a contentious debate over what constitutes U S security interests *The New US Strategy towards Asia* William T Tow, Douglas Stuart, 2014-12-17 Barack Obama s rebalancing or pivot strategy intended to demonstrate continued US commitment to the Asia Pacific region in a variety of military economic and diplomatic contexts was launched with much fanfare in 2011 Implicit in the new strategy is both a focus on China engagement with and containment of and a heavy reliance by the United States on its existing friends and allies in the region in order to implement its strategy This book explores the impact of the new strategy on America s regional friends and allies It shows how these governments are working with Washington to advance and protect their distinct national interests while at the same time avoiding any direct confrontation with China It also addresses the reasons why many of these regional actors harbour concerns about the ability of the US to sustain the pivot strategy in the long run Overall the book illustrates the deep complexities of the United States exercise of power and influence in the region ***The New U.S. Strategic Debate***, 1994 This RAND report examines the emerging debate in the United States over post Cold War national security strategy It discusses the ideas now clashing and competing for preeminence as our leaders seek to forge a new post Cold War national security consensus in a changing domestic context For the past four decades the United States has enjoyed a bipartisan consensus in national security strategy That consensus is now eroding as politicians and diplomats strategists and defense planners and scholars and the general public grapple with the meaning of the end of the Cold War In its place a burgeoning debate is emerging about the nature of the post Cold War world and the desired American role in it Against this background strategists and defense planners need more than ever before to be cognizant of the domestic pressures reshaping elite and public thinking This essay should be read as a contribution to a better understanding of these factors *A Grand Strategy for America* Robert J. Art, 2013-02-01 The United States today is the most powerful nation in the world perhaps even stronger than Rome was during its heyday It is likely to remain the world s preeminent power for at least several decades to come What behavior is appropriate for such a powerful state To answer this question Robert J Art concentrates on grand strategy the deployment of military power in both peace and war to support foreign policy goals He first defines America s contemporary national interests and the specific threats they face then identifies seven grand strategies that the United States might contemplate examining each in relation to America s interests The seven are dominion forcibly trying to remake the world in America s own image global collective security attempting to keep the peace everywhere regional collective security confining peacekeeping efforts to Europe cooperative security seeking to reduce the occurrence of war by limiting other states offensive capabilities isolationism withdrawing from all military involvement beyond U S borders containment holding the line against aggressor states and

selective engagement choosing to prevent or to become involved only in those conflicts that pose a threat to the country's long term interests Art makes a strong case for selective engagement as the most desirable strategy for contemporary America It is the one that seeks to forestall dangers not simply react to them that is politically viable at home and abroad and that protects all U S interests both essential and desirable Art concludes that selective engagement is not a strategy for all times but it is the best grand strategy for these times

Perceptions of NATO and the New Strategic Concept Luís Nuno Rodrigues, Volodymyr Dubovyk, 2010 This book attempts to address how NATO and its mission are perceived today in the world to assess the challenges the Organisation is facing in the near future and to debate what could be its role in the 21st century This is most relevant since the Organisation has just celebrated its 60th anniversary and is in the process of redefining its strategic concept to try to shape the right strategy for a safer tomorrow This book deals with the following How is the Organisation perceived in member and so called partner countries such as Russia and Georgia with regards to models policies and strategies What do the younger generations born after the end of the Cold War think of the Atlantic Alliance in the present and its role in the future The evolution of the Alliance towards a transatlantic hub and last but not least an analysis on the importance of communications in NATO's current campaign in Afghanistan Key features NATO's durability The future of the Alliance NATO's role as a guarantee of Peace and Security in the South Caucasus
