NOAA Technical Report NMFS SSRF, 1975 The Next Social Contract Wayne Gabardi, 2017-05-15 In his provocative book *The Next Social Contract* Wayne Gabardi rigorously considers the fate of animals in the twenty first century He claims that if we are to address the challenges raised by the Anthropocene the period where nonhuman beings tend to be mere extras often subsumed under the umbrella notion of nature we need to radically rethink our basic ethical outlook and develop a new more than human social contract Gabardi's wide ranging and multidisciplinary analysis focuses on four principal battlegrounds of animal biopolitics in the twenty first century the extinction of wild animals the crisis of oceanic animals industrialized farm animals and the future of industrial agribusiness and the situation of contact zone animals moving into human occupied habitats In his recasting of the social contract Gabardi envisions a culture shift in human animal relations toward posthumanism that features the ethical and political prioritization of animal life so it is on par with that of human well being

SOCIAL PROBABILITY THEORY, HISTORICAL AND NATURAL OBSERVATIONS: Dr. Rose Sabina Griffith Hunte, 2014-06-10 The social probability theories and historical natural observations contained in this book were developed over many years and others are based on observations and current events in history I have also included two new products I discovered while living in my native country of Saint Lucia Additionally I review the world its beauty and its history Humanity has reached a milestone While in Saint Lucia I noted several alien sightings and have shared my observations of these sightings through this book I reviewed many natural and historical observations have looked at the world and saw the wonder it contains The reader will see references to Mind Probe technology This technology is used by governments with the technology to conduct systematic checks on people of interest I became aware of the technology while living in Saint Lucia because of the alien sightings I witnessed and the conclusions I drew from those sightings It is imperative that as a society we do not perceive these alien visitors as a threat It is my summation that they can be the harbingers of great technology and enhanced medical care that will benefit humanity I hope that with the writing of this book the scientific community and committee that discusses these phenomena will welcome me as a member because I believe I can contribute greatly to their investigation of the alien presence that I surmise have been visiting earth for thousands if not millions of years
