

Type Classification

During the 1800s a system of classifying type was derived, and although numerous other systems and subsets of this system exist, one of those is:

Humanist | Old Style | Transitional
Modern | Slab Serif | Sans Serif

Before Humanist

The very first form of movable type was Blackletter. Also referred to as Black, Gothic, Fraktur or Old English.

māgīngi mīlha scēttēn quī
gūmā. De filiis uind p gr

Black letter in a Latin Bible of AD 1487

Humanist

(sometimes referred to as Venetian)
1460s & 1470s

What makes humanist, humanist?

1. Sloping cross-bar on the lowercase "r";
2. Relatively small x-height;
- Low contrast between "thick" and "thin" strokes (usually that means that there is little variation in the stroke width)

eius

- Modelled on humanist Italian writers.
- Strong roots in calligraphy.
- It is the first roman type.

Great grand parents of today's type

Although the influence of Humanist types is far reaching, they aren't often seen these days. However, they deserve our attention because they are the great grand-parents of today's types. Examples: Bembo, Garamond

Old Style

This period saw type getting into gear

1. Horizontal cross-bar on the lowercase "r";
 2. More upright stress;
 3. Wedge shaped serifs;
- Higher contrast between "thick" and "thin" strokes (increases legibility)

e o d
Endeavour
Endeavour
Old style

- The first Italic type was designed in 1501.
- Old Style type is sharper in appearance.

Still popular text faces

Unlike the relatively short lived Humanist faces, the Old Style faces held sway for more than two centuries; a number of them are still popular text faces today. Examples: Bembo, Garamond, Palatino, Study Old Style, Galle

Transitional

(or Neoclassical)

Moving away from calligraphic forms

1. Vertical or almost vertical stress in the bowls of lowercase letters;
2. greater contrast between thick and thin strokes

o o o
Humanist Old style Transitional
M M
Baskerville Bodoni

- Transitional types have no influence of the handwritten letter form.

Orientation with time

These typefaces are still used for specific content pertaining to that era. It is used for modern day brand names and text faces. Examples: Baskerville, Bodoni, Garamond

Modern

(or Didone)

Taking contrast to further extremes

1. High and abrupt contrast between thick and thin strokes;
 2. Abrupt (unbracketed) hairline (thin) serifs;
 3. Small apertures;
- Vertical axis and horizontal stress

didone

- Both Old Style and Moderns share vertical axis, Moderns have higher contrast
- More Precise and sharper

Functional and clean

They're generally not suited to setting extended text, as the verticality of the letter forms interfere with the text's horizontal rhythm. They need lots of white space and inter-line space, so give them extra leading and generous margins. Examples: TC Bodoni, Didot, Modern No. 20

Slab Serif

(or Egyptian Square serif)

Born in Britain, nothing to do with Egypt

1. Thinner serifs; 2. Bracketed serifs;
3. Larger x-height;
4. The slab serif period saw another subset of type called Fat faces. It is basically a modern style type only carrying all that extra weight.

n l
FAT FACE

- The idea of display faces came into being.

Designed to be noticed

These are found on posters, leaflets, pamphlets and billboards of the day. It's suited for display as it is loud and stands out of the crowd. Slab serif examples: Clarendon, American Typographer Fat face example: Poster Bodoni.

The Non Designers Type

Dina C Carson

The Non Designers Type:

The Non-designer's Type Book Robin Williams, 1998 This latest addition to Robin Williams Non Designers line of books not only defines the principles governing type but explains the logic behind them so readers can understand and see what looks best and why Armed with this knowledge and putting into practice the secrets Robin reveals for making type readable and artistic readers can then go on to create beautiful sophisticated professional looking pages on their computers for output as hard copy or for use on Web pages Each short chapter explores a different type secret including use of evocative typography tailoring typeface to project working with spacing punctuation marks special characters fonts justification and much more It is written in the lively engaging style that has made Williams one of the most popular computer authors today And it uses numerous examples to illustrate the subtle details that make the difference between good and sophisticated use of type The non platform specific non software specific approach to the book makes this a must have for any designer s bookshelf from type novices to more experienced graphic designers and typesetters Please note If you ve read Beyond the Mac is not a typewriter then you don t need this book This book is almost exactly the same as Beyond the Mac is not a typewriter
