Credit Risk Modeling Elizabeth Mays, 1998-12-10 Covers Implementing an application scoring system Behavior modeling to manage your portfolio Incorporating economic factors Statistical techniques for choosing the optimal credit risk model How to set cutoffs and override rules Modeling for the sub prime market How to evaluate and monitor credit risk models This is an indispensable guide for credit professionals and risk managers who want to understand and implement modeling techniques for increased profitability In this one of a kind text experts in credit risk provide a step by step guide to building and implementing models both for evaluating applications and managing existing portfolios Statistics and the Evaluation of Evidence for Forensic Scientists Colin Aitken, Franco Taroni, 2004-08-13 The first edition of *Statistics and the Evaluation of Evidence for Forensic Scientists* established itself as a highly regarded authority on this area Fully revised and updated the second edition provides significant new material on areas of current interest including Glass Interpretation Fibres Interpretation Bayes Nets The title presents comprehensive coverage of the statistical evaluation of forensic evidence It is written with the assumption of a modest mathematical background and is illustrated throughout with up to date examples from a forensic science background The clarity of exposition makes this book ideal for all forensic scientists lawyers and other professionals in related fields interested in the quantitative assessment and evaluation of evidence There can be no doubt that the appreciation of some evidence in a court of law has been greatly enhanced by the sound use of statistical ideas and one can be confident that the next decade will see further developments during which time this book will admirably serve those who have cause to use statistics in forensic science D V Lindley Introductory Statistics for the Health Sciences Lise DeShea, Larry E. Toothaker, 2015-03-25 *Introductory Statistics for the Health Sciences* takes students on a journey to a wilderness where science explores the unknown providing students with a strong practical foundation in statistics Using a color format throughout the book contains engaging figures that illustrate real data sets from published research Examples come from many area *Anthology of Statistics in Sports* Jim Albert, Jay Bennett, James J. Cochran, 2005-01-01 The unlikely worlds of sports fans and statisticians collide in this interesting and accessible collection of previously published articles on the use of statistics to analyze sports which the editors have thoughtfully culled from a variety of American Statistical Association ASA publications Heavily weighted in the areas of competition rating players and teams evaluating strategies for victory the articles vary in mathematical complexity but most will be accessible to readers with a general knowledge of statistics Newly written material from the editors and other notable contributors introduces each section of the book and a chapter with suggestions on using the articles in the classroom is included Organized by sport to make it easy for readers to find the papers in their particular areas of interest *Anthology of Statistics in Sports* contains separate sections devoted to the major North American team sports of baseball football basketball and ice hockey Two additional sections cover miscellaneous sports and more general issues related to sports and statistics This book grew from

the efforts of members of the ASA Section on Statistics in Sports which is dedicated to promoting high professional standards in the application of statistics to sports and fostering statistical education in sports

Applied Multivariate Statistics for the Social Sciences Keenan A. Pituch, James P. Stevens, 2015-12-07 Now in its 6th edition the authoritative textbook Applied Multivariate Statistics for the Social Sciences continues to provide advanced students with a practical and conceptual understanding of statistical procedures through examples and data sets from actual research studies With the added expertise of co author Keenan Pituch University of Texas Austin this 6th edition retains many key features of the previous editions including its breadth and depth of coverage a review chapter on matrix algebra applied coverage of MANOVA and emphasis on statistical power In this new edition the authors continue to provide practical guidelines for checking the data assessing assumptions interpreting and reporting the results to help students analyze data from their own research confidently and professionally Features new to this edition include NEW chapter on Logistic Regression Ch 11 that helps readers understand and use this very flexible and widely used procedure NEW chapter on Multivariate Multilevel Modeling Ch 14 that helps readers understand the benefits of this newer procedure and how it can be used in conventional and multilevel settings NEW Example Results Section write ups that illustrate how results should be presented in research papers and journal articles NEW coverage of missing data Ch 1 to help students understand and address problems associated with incomplete data Completely re written chapters on Exploratory Factor Analysis Ch 9 Hierarchical Linear Modeling Ch 13 and Structural Equation Modeling Ch 16 with increased focus on understanding models and interpreting results NEW analysis summaries inclusion of more syntax explanations and reduction in the number of SPSS SAS dialogue boxes to guide students through data analysis in a more streamlined and direct approach Updated syntax to reflect newest versions of IBM SPSS 21 SAS 9.3 A free online resources site at www.routledge.com/9780415836661 with data sets and syntax from the text additional data sets and instructor s resources including PowerPoint lecture slides for select chapters a conversion guide for 5th edition adopters and answers to exercises Ideal for advanced graduate level courses in education psychology and other social sciences in which multivariate statistics advanced statistics or quantitative techniques courses are taught this book also appeals to practicing researchers as a valuable reference Pre requisites include a course on factorial ANOVA and covariance however a working knowledge of matrix algebra is not assumed

Categorical Data Analysis for the Behavioral and Social Sciences Razia Azen, Cindy M. Walker, 2011-01-07 Featuring a practical approach with numerous examples this book focuses on helping the reader develop a conceptual rather than technical understanding of categorical methods making it a much more accessible text than others on the market The authors cover common categorical analyses and emphasize specific research questions that can be addressed by each analytic procedure so that readers are able to address the research questions they wish to answer To achieve this goal the authors Review the theoretical implications and assumptions underlying each of the procedures Present each concept in general terms and illustrate each with a practical example

Demonstrate the analyses using SPSS and SAS and show the interpretation of the results provided by these programs A Look Ahead section at the beginning of each chapter provides an overview of the material covered so that the reader knows what to expect This is followed by one or more research questions that can be addressed using the procedures covered in the chapter A theoretical presentation of the material is provided and illustrated using realistic examples from the behavioral and social sciences To further enhance accessibility the new procedures introduced in the book are explicitly related to analytic procedures covered in earlier statistics courses such as ANOVA and linear regression Throughout each chapter the authors use practical examples to demonstrate how to obtain and interpret statistical output in both SPSS and SAS Their emphasis on the relationship between the initial research question the use of the software to carry out the analysis and the interpretation of the output as it relates to the initial research question allows readers to easily apply the material to their own research The data sets for executing chapter examples using SAS Version 9 1 3 and or IBM SPSS Version 18 are available on a book specific web site These data sets and syntax allow readers to quickly run the programs and obtain the appropriate output The book also includes both conceptual and analytic end of chapter exercises to assist instructors and students in evaluating the understanding of the material covered in each chapter This book covers the most commonly used categorical data analysis procedures It is written for those without an extensive mathematical background and is ideal for graduate courses in categorical data analysis or cross classified data analysis taught in departments of psychology human development family studies sociology education and business Researchers in these disciplines interested in applying these procedures to their own research will appreciate this book's accessible approach
