The Healing Magic Of Music:

The Healing Magic of Music Robert McParland, 2003-10 At the height of the Great Depression the narrator loses his job in the Butte copper mines and leaves home to look for work despite the fact that there are eighteen million unemployed and his chances are slim He hoboos 10 000 miles throughout the West stealing rides in boxcars and passenger trains hitchhiking on the roads He stops at hobo jungle and Hoovervilles encounters sadistic railroad security and always capitalized the Law He digs potatoes for a quarter a day washes cars for a penny each boxes in a carnival for two dollars a fight He is picked up as a vagrant beds down in a brothel watches a hanging and winds up in the county jail on suspicion of murder Because his story is largely autobiographical every word rings true He is a Depression era pilgrim and the people he meets comprise the face of America in despair There are authentic and persuasive portraits of people trying to find their way through one of the most desperate times in history O Malley s graphic first hand account will tell you what it was really like *The Healing Energies of Music* Hal A. Bonnet, 2019-01-15 This study of the subtlety complexity and variety of modes of hearing maps out a sonorous archipelago a heterogeneous set of shifting sonic territories shaped by the vicissitudes of desire and discourse Profoundly intimate yet immediately giving onto distant spaces both an organ of fear and an echo chamber of anticipated pleasures an uncontrollable flow subject to unconscious selection and augmentation the subtlety complexity and variety of modes of hearing has meant that sound has rarely received the same philosophical attention as the visual In *The Order of Sounds* Fran ois J Bonnet makes a compelling case for the irreducible heterogeneity of sound navigating between the physical models constructed by psychophysics and refined through recording technologies and the synthetic production of what is heard From primitive vigilance and sonic mythologies to digital sampling and sound installations he examines the ways in which we make sound speak to us in an analysis of listening as a plurivocal phenomenon drawing on Foucault Deleuze and Guattari Barthes Nancy Adorno and de Certeau and experimental pioneers such as Tesla Bell and Raudive Stringent critiques of the soundscape and reduced listening demonstrate that univocal ontologies of sound are always partial and politicized for listening is always a selective fetishism a hallucination of sound filtered by desire and convention territorialized by discourse and its authorities Bonnet proposes neither a disciplined listening that targets sound itself nor an ocean of sound in which we might lose ourselves but instead maps out a sonorous archipelago a heterogeneous set of shifting sonic territories shaped and aggregated by the
