The Heron's Catch Susan Curran, 1989-01

The Herons Handbook James Hancock, James A. Kushlan, 2010-09-30
Everything you ever wanted to know about the world's herons. This book on herons and bitterns is an authoritative summary of what is currently known about this diverse and fascinating worldwide family of wading birds. It is the result of extensive studies carried out over many years by its distinguished authors on both sides of the Atlantic. The plumages, feeding and breeding behaviour and ecology of each of the recognised species is illustrated in full colour with paintings meticulously researched by Robert Gilman and Peter Hayman. A distribution map based on the latest available information also shows the range of each species. Because of the widening interest in wading birds, considerable attention is paid to identification in the field. Four identification plates especially prepared by Robert Gillmor show all the plumages in each stage of every species and race of white herons and egrets. This information invaluable for ornithologists and birdwatchers has never before been brought together in one volume. References to all the relevant literature on herons and bitterns is included for those who want to make a deeper study of these birds and the authors have contributed their own considerable experiences gained in the field. The definitive handbook on herons, this book will not only provide the basis for future research and conservation but will also be a source of interest and enjoyment for both birdwatchers and ornithologists.

The Herons of Europe Claire Voisin, 2010-10-30
Although the majority of the world's Herons live in the tropics and subtropics, Europe is home to nine species, some large, some small, some colonial, some solitary breeders. Highly specialized birds, they exhibit many interesting differences in their behaviour and ecology and are a favourite group for many ornithologists. Voisin begins her book with a general description of the family before going on to treat each species in more detail. The species accounts summarize such topics as field characters, distribution, population size, breeding and feeding ecology and behaviour. Numerous figures and tables are accompanied by fine drawings of behaviour by P. L. Suiro and colour and black and white pictures of each species by Gunnar Brusewitz.

The Great Blue Heron Robert William Butler, 1997
With its striking plumage, the great blue heron is one of the most widely recognized wading birds in North America. Riding on kelp beds in the Queen Charlotte Islands, wading in coastal streams along the mainland, poised motionless at the water's edge on a misty morning or nesting in the limbs of old growth forests, this stately bird is a familiar sight on the coast of British Columbia. The largest colonies are on the Fraser River delta, an area of great ecological significance to the north Pacific. Despite a growing body of knowledge regarding many aspects of the species' breeding biology and courtship behaviour, the foraging and population ecology of this bird remains something of an enigma. In his beautifully illustrated book, Robert Butler follows the great blue heron through a year on the coast of British Columbia. He draws on more than a decade of work to throw light on the adaptability of this magnificent bird to a temperate climate, its diet and breeding habits, habitat use and conservation. Although the great blue heron has become a symbol of wetland conservation in recent years, it has had to face new challenges as a consequence of

rapid urbanization of its environment In *The Great Blue Heron* the author also describes the B C coast and shares a vision for the conservation of the Strait of Georgia and the Fraser River delta

If Tom Montgomery Fate has not found the secret formula for the deliberate, balanced life, he is a chief disciple of the search. Chicago Tribune: Try to imagine Thoreau married with a job, three kids, and a minivan. This is the sensibility, serious yet irreverent, that suffuses *Cabin Fever* as the author seeks to apply the hermit philosopher's insights to a busy modern life. Tom Montgomery Fate lives in a Chicago suburb where he is a husband, father, professor, and active member of his community. He also lives in a cabin built with the help of friends in the Michigan woods where he walks by the river, chops wood, and reads Thoreau by candlelight. Fate seeks a more attentive, deliberate way of seeing the world and our place in it, not only in the woods but also

in the context of our relationships and society In his search for a more deliberate life amid a high tech material world Fate invites readers into an interrogation of their own lives and into a new kind of vision the possibility of enough in a culture of more
