Translational Hermeneutics Radegundis Stolze, John Stanley, Larisa Cercel, 2015-06-22 This volume presents selected papers from the first symposium on Hermeneutics and Translation Studies held at Cologne in 2011 Translational Hermeneutics works at the intersection of theory and practice It foregrounds both hermeneutical philosophy and the various traditions especially phenomenology to which it is indebted in order to explore the ways in which the individual person figures at the center of the mediating process of translation Translational Hermeneutics offers alternative ways to understand the process of translating it is a holistic and strategic process that enhances understanding by assisting the transmission of meaning in and across multiple social and cultural contexts The papers in this collection accordingly provide

a preliminary outline of Translational Hermeneutics Gathered together these papers broach a new discipline within Translation Studies While some essays explain the theoretical foundations of this approach others concentrate on practical applications in diverse fields for example literary studies and postcolonial studies
