The New Wood Architecture:

The New Wood Architecture Naomi Stungo, Jennifer Hudson, 1998 Wood Architecture Ruth Slavid, 2005 Timber is having a renaissance as an architectural material as more architects come to understand its properties and enjoy adding it to their repertoire of materials With a growing crop of good new timber buildings architects are coming to realise that this is no longer the sole preserve of the traditionalist but a material that has an important role to play in the contemporary world The book's introduction examines the ways in which a raw material of diminishing quality but abundant quantity can be stretched to perform as it has never done before using new technology and careful detailing The 40 case studies are devoted to some of the most interesting new wood projects from around the world The projects are grouped in seven themed chapters Featured architects from around the world include Steven Holl Foster and Partners Rural Studio Renzo Piano and Shigeru Ban

New Wood Architecture Ruth Slavid, 2005-01-01 A detailed and timely look at the resourceful ways wood is being used in some of the world's most innovative new buildings **Solid Wood** Joseph Mayo, 2015-10-05 Over the past 10-15 years a renaissance in wood architecture has occurred with the development of new wood building systems and design strategies elevating wood from a predominantly single family residential idiom to a rival of concrete and steel construction for a variety of building types including high rises This new solid wood architecture offers unparalleled environmental as well as construction and aesthetic benefits and is of growing importance for professionals and academics involved in green design Solid Wood provides the first detailed book which allows readers to understand new mass timber massive wood architecture It provides historical context in wood architecture from around the world a strong environmental rationale for the use of wood in buildings recent developments in contemporary fire safety and structural issues insights into building code challenges detailed case studies of new large scale wood building systems on a country by country basis Case studies from the UK Norway Sweden Germany Austria Italy Canada the United States New Zealand and Australia highlight design strategies construction details and unique cultural attitudes in wood design The case studies include the most ambitious academic hospitality industrial multi family and wood office buildings in the world With discussions from leading architectural engineering and material manufacturing firms in Europe North America and the South Pacific Solid Wood disrupts preconceived notions and serves as an indispensable guide to twenty first century wood architecture and its environmental and cultural benefits *New Architecture in Wood* Marc Wilhelm Lennartz, Susanne Jacob-Freitag, 2015-11-27 Timber the old raw material and building material returns There are many reasons today for building with wood and there are great advantages over conventional designs Wood is not only a renewable building material that helps reduce the levels of CO₂ and is hence good for climate change but due to modern computing and manufacturing processes it can also be used for a variety of construction tasks Wood possesses excellent qualities for both construction and indoor climate control and can easily be combined with other common building materials Based on 24 international projects

the book provides an overview of the range of possibilities in wood construction today Texts images and plans document the architectural and constructive qualities of contemporary timber structures from the conceptual design to the structure in detail The various uses are based on current research in modern timber engineering but also on timber construction expertise that has been developing over many centuries This special discipline has evolved significantly in recent decades particularly in Germany Austria and Switzerland and is a world leader today **Neue Holzarchitektur in Skandinavien**
