In all genealogical work the first and most important step is to establish the geographical origin of the ancestor In Irish
research the genealogist may know the name of the county where the ancestor lived but be puzzled about a place name given
as the place of birth or residence In all probability the place name s that of a townland the smallest territorial subdivision in
Ireland Since research in Ireland will usually start at the parish level there must be a reference tool that will key the
townland to the parish in which it is located This work was prepared under the auspices of the British government for almost
that purpose The over 900 densely printed pages show the county barony parish and poor law union in which the 70 000
townlands were situated in 1851 as well as the location of the townlands on the Great Ordnance Survey maps with
appendices containing separate indexes to parishes and baronies **"The" Journal of Botany, British and Foreign** ,1882
