Spatiality, Sovereignty and Carl Schmitt Stephen Legg, 2011-05-17 The writings of Carl Schmitt are now indissociable from both an historical period and a contemporary moment He will forever be remembered for his association with the National Socialists of 1930s Germany and as the figure whose writings on sovereignty politics and the law provided justification for authoritarian decisional states Yet at the same time the post September 11th 2001 world is one in which a wide range of scholars have increasingly turned to Schmitt to understand a world of with us or against us Manichaeism spaces of exception which seem to be placed outside the law by legal mechanisms themselves and the contestation of a unipolar post 1989 world This attention marks out Schmitt as one of the foremost emerging theorists in critical theory and assures his work a large and growing audience This work brings together geographers and Schmitt experts who are attuned to the spatial dimensions of his work to discuss his 1950 work *The Nomos of the Earth in the International Law of the Jus Publicum Europaeum* Explaining the growing audience for Schmitt's work a broad range of contributors also examine the Nomos in relation to broader debates about enmity and war the production of space the work of Michel Foucault and Giorgio Agamben and the recuperability of such an intellect tainted by its anti-Semitism and links to the Nazi party This work will be of great interest to researchers in political theory socio-legal studies geopolitics and critical IR theory Routes and Roots Elizabeth DeLoughrey, 2009-12-31 Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean tides to destabilize the national ethnic and even regional frameworks that have been the mainstays of literary study The result is a privileging of alter-native epistemologies whereby island cultures are positioned where they should have been all along at the forefront of the world historical process of transoceanic migration and landfall The research

determination and intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature Vilsoni Hereniko University of Hawai i Elizabeth DeLoughrey brings contemporary hybridity diaspora and globalization theory to bear on ideas of indigeneity to show the complexities of native identities and rights and their grounded opposition as indigenous regionalism to free floating globalized cosmopolitanism Her models are instructive for all postcolonial readers in an age of transnational migrations Paul Sharrad University of Wollongong Australia Routes and Roots is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue Taking the tidalectic between land and sea as a dynamic starting point Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between routes and roots The first section looks at the sea as history in literatures of the Atlantic middle passage and Pacific Island voyaging theorizing the transoceanic imaginary The second section turns to the land to examine indigenous epistemologies in nation building literatures Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered exploring how masculine travelers are naturalized through their voyages across feminized lands and seas This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel positioning island cultures in the world historical process In fact DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropolises that deemed them peripheral to modernity Fresh in its ideas original in its approach Routes and Roots engages broadly with history anthropology and feminist postcolonial Caribbean and Pacific literary and cultural studies It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines **Marine Conservation** P. Keith Probert, 2017-07-06 A crucial timely synthesis of issues and solutions for the conservation of the world's seas and marine life *Portraits of Women in International Law* Immi Tallgren, 2023-04-15 Current histories seem to suggest that men alone have been capable of the development of ideas analysis and practice of international law until the 1990s Is this the case Or have others been erased from the collective images of this history including the portrait gallery of notables in international law *Portraits of Women in International Law* New Names and Forgotten Faces investigates the slow and late inclusion of women in the spheres of knowledge and power in international law The forty two textual and visual representations by a diverse team of passionate portraitists represent women and gender non conforming people in international law from the fourteenth century onwards around the world individuals and groups who imagined developed or contested international law who earned their living in its institutions or who even indirectly may have changed its course This rich volume calls for a critical identification of the formal and informal institutional practices norms and rituals of white masculinities both in the past and in the research of international law today By abandoning reductive histories their biased frames and tacit assumptions this work brings previously unseen glimpses of international law and its agents ideas causes

behaviour norms and social practices into the spotlight
