**Practice Theory Perspectives on Pedagogy and Education** Peter Grootenboer, Christine Edwards-Groves, Sarojni Choy, 2017-01-16 This book examines the way in which the practice turn in education and pedagogy offers unique perspectives on the nature of educational work. Through a plurality of practice theories deeper understandings emerge about a range of education and concepts providing useful tools for advancing and developing practice theory in education and pedagogy. The book discusses the related and dual perspectives of pedagogy as both a teaching and an upbringing practice. It also explores education in a range of contexts and sectors beyond school including VET, tertiary and non formal settings. Education is seen as serving a dual purpose the development of individuals and the betterment of societies and community and this conceptualisation of education underpins the book. It acknowledges that there are diverse understandings and perspectives of practice theory pedagogy and education each of which is contestable and ripe for further development and this is examined throughout the book. This book was developed alongside an invited symposium held in June 2015 in Brisbane Australia where the authors and interested others gathered to discuss practice theory perspectives on pedagogy and education. The title Practice Theory Perspectives on Pedagogy and Education captures the central overarching focus that underpins the book.

**Indigenous Perspectives on Sacred Natural Sites** Jonathan Liljeblad, Bas Verschuuren, 2018-12-17 Much previous literature on sacred natural sites has been written from a non indigenous perspective. In contrast this book facilitates a greater self expression of indigenous perspectives regarding treatment of the sacred and its protection and governance in the face of threats from various forms of natural resource exploitation and development. It provides indigenous custodians the opportunity to explain how they view and treat the sacred through a written account that is available to a global audience. It thus illuminates similarities and differences of both definitions, interpretations and governance approaches regarding sacred natural phenomena and their conservation. The volume presents an international range of case studies from the recent controversy of pipeline construction at Standing Rock a sacred site for the Sioux people spanning North and South Dakota to others located in Australia, Canada, East Timor, Hawaii, India, Mexico, Myanmar, Nigeria and the Philippines. Each chapter includes an analytical introduction and conclusion written by the editors to identify common themes, unique insights and key messages. The book is therefore a valuable teaching resource for students of indigenous studies, anthropology, religion, heritage, human rights and law, nature.

*Exploring the Role of Visualization in Climate Change Communication – an Audience Perspective* Anne Gammelgaard Ballantyne,2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way

of increasing public engagement with climate change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences Nevertheless despite these communicative qualities the analyses also show that participants interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations Although climate visualization can enhance a sense of proximity with climate change the localization of climate risk can also lead to participants downplaying the significance of climate impacts In addition despite the intentions of inducing a sense of agency in both cases of climate visualization participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors These findings show that although climate visualization presents certain communicative qualities it is not a panacea for engaging lay audiences with climate change This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication Kommunikation kring klimatfr

klimatvisualisering ur ett mottagarperspektiv Denna avhandling adresserar denna kunskapslucka Det vergripande syftet r s  
ledes att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med s rskilt fokus p hur lekm n

tolkar innehåll den av klimatförändringar som de representeras i tv exempel på klimatvisualisering. Avhandlingen behandlar även klimatvisualiseringens många bidrag och eller begränsningar ur ett kommunikationsperspektiv. Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till tv exempel på klimatvisualiseringen i film som visas i en domteater framtagen för svenska gymnasieelever med målsättningen att uppmuntra till reflektion kring klimatförändringarnas orsaker, effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stötta att härbärge i Norden att anpassa sig till klimatförändringarnas lokala effekter. Resultaten av denna avhandling visar att klimatvisualisering kan stötta mottagarna att konkretisera annars abstrakta aspekter av klimatförändringar och att ett lokalt fokus kan få klimatförändringarna att framställa som mer personligt relevanta och intressanta för mig. Dock visar analyserna även trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras erfarenhet om klimatförändringar som ett globalt och avgivet problem som ska tas av andra aktörer som nationella regeringar eller genom internationella politiska handlingar. Ven om klimatvisualisering kan få rörelsen att röra sig till klimatförändringar kan lokaliseringen av klimatriskerna leda till att deltagare tonar ned de lokala klimatriskernas betydelse. Dessutom trots att bilden av klimatvisualiseringen är att skapa en känsla av att kunna påverka och få svar från klimatpolitiker, blev ansvaret för klimatförändringar kritisk för handling från deltagarnas sida de förlade ansvaret för att hantera klimatutmaningarna till andra aktörer. Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte riktigt fungerat för klimatkommunikation. Detta understryker den vikten av att ta hänsyn till kulturella och sociala aspekter av den kommunikativa handelsen när man studerar och utvecklar verktyg för klimatvisualisering.

**Less Frequently Used Research Methodologies in Applied Linguistics** A. Mehdi Riazi, 2024-01-15

Research methodology plays a pivotal role in generating new knowledge in any academic discipline. Applied Linguistics (AL) researchers use a variety of research methodologies to address different research problems and research questions given its interdisciplinary nature. Notwithstanding the plethora of research methodologies used by AL researchers, there are some methodologies that are used less frequently. The aim of this volume is to introduce and discuss these less frequently used methodologies. Each methodology is discussed in two chapters: a theoretical and a practical chapter. In the theoretical chapters, the theoretical foundations, methodological orientation, ethical issues, and critiques and responses are discussed. In the practical chapters, a showcase study is presented and discussed, including why the methodology was used, how it was implemented, the challenges the researchers faced, and the insights they gained. The volume contributes to the current methodological discussion in AL and provides early career and seasoned researchers with the necessary discussion about these methodological orientations. Future AL researchers may use these methodologies to investigate research questions in their areas of interest. In addition, the volume can complement current methodological resources in postgraduate research methodology courses.
