Interactive Learning Through Visualization Steve Cunningham, Roger J. Hubbard, 2012-12-06 This book contains a selection of papers presented at the Computer Graphics and Education 91 Conference held from 4th to 6th April 1991 in Begur Spain The conference was organised under the auspices of the International Federation for Information Processing IPIP Working Group 5.10 on Computer Graphics The goal of the organisers was to take a forward look at the impact on education of anticipated developments in graphics and related technologies such as multimedia in the next five years We felt that at a time when many educational establishments are facing financial stringency and when major changes are taking place in patterns of education and training this could be valuable for both educators and companies developing the technology for educators because they are often too bogged down in day to day problems to undertake adequate forward planning and for companies to see some of the problems faced by educators and to see what their future requirements might be

Nash, Harriet F. Senie, Alan G. Wilkinson, 2001-01-01 Henry Moore 1898 1986 is arguably one of the most famous and beloved sculptors of the twentieth century yet in recent decades his work has fallen out of favor in the world of contemporary art criticism This handsome book examines this intriguing contradiction and seeks to reassess Moore s crucial contribution to art of the last century Looking at Moore s early engagements with primitivism his 1930s dialogue with abstraction and surrealism and his postwar interest in large scale public sculpture the authors show how the sculptor helped to define some of the most significant aspects of modernism The authors also contextualize within the polemics of early modernism Moore s emphasis on direct carving instead of modeling and the necessary balance between abstraction and what he called the

psychological human element Moore's early sculpture largely unfamiliar to the general public is given particular attention enabling the reader to explore the evolution of thematic and formal elements in his work and his ongoing response to different materials Photographs some by Moore himself of over 120 works including plasters maquettes carvings bronzes and drawings are featured many of which are previously unpublished Glossary of Art, Architecture & Design Since 1945 John Albert Walker, 1992

The Accidental Possibilities of the City Katherine Smith, 2021-03-02 Claes Oldenburg's commitment to familiar objects has shaped accounts of his career but his associations with Pop art and postwar consumerism have overshadowed another crucial aspect of his work In this revealing reassessment Katherine Smith traces Oldenburg's profound responses to shifting urban conditions framing his enduring relationship with the city as a critical perspective and conceiving his art as urban theory Smith argues that Oldenburg adapted lessons of context gleaned from New York's changing cityscape in the late 1950s to large scale objects and architectural plans By examining disparate projects from New York to Los Angeles she situates Oldenburg's innovations in local geographies and national debates In doing so Smith illuminates patterns of urbanization through the important contributions of one of the leading artists in the United States *Going Public* Jeffrey L.
