Persuasion after Rhetoric in the Eighteenth Century and Romanticism Yasmin Solomonescu, Stefan H. Uhlig, 2024-07-18 While the question of how rhetoric lost authority to modern philosophical and scientific inquiry has drawn much scrutiny we have paid less attention to how values that were once bound up with rhetoric were rearticulated after its demise This volume explores how persuasion ceased to be the seemingly self evident objective of rhetoric and became instead a variable and substantive focus for discussion in its own right After rhetoric ceded much of its centrality to logic and empirical procedures the significance and implications of persuasion were the subject of renewed attention in a range of different fields including philosophy law poetry novels botany cultural criticism historiography political thought and public lecturing *Persuasion after Rhetoric in the Eighteenth Century and Romanticism* maps how values of persuasion were adapted and diversified in ways that still resonate with current arguments about conviction understanding and belief Contributors address the figurations of persuasion in a range of theorists and writers from Jean Jacques Rousseau Adam Smith Immanuel Kant Edmund Burke and Mary Wollstonecraft to Samuel Richardson Jane Austen Thomas De Quincey Thomas Campbell William Hazlitt Heinrich Heine William Lloyd Garrison and Frances Ellen Watkins Harper This collection offers a detailed account of persuasive interests at the threshold of modernity It also prompts us to rethink persuasion now that its continued efficacy seems at risk in a fragmented public sphere

Justice and Health Care E.E. Shelp, 2012-12-06 Bioethics is a discipline still not fully explored in spite of its rather remarkable expansion and sophistication during the past two decades The proliferation of courses in bioethics at educational institutions of every description gives testimony to an intense academic interest in its concerns The media have catapulted the dilemmas of bioethics out of the laboratory and library into public view and discussion with a steady report of the so called miracles of modern medicine and the moral perplexities which frequently accompany them The published work of philosophers theologians lawyers and others represents a substantial and growing body of literature which explores relevant concepts and issues Commitments have been made by existing institutions and new institutions have been chartered to further the discussion of the strategic moral concerns that attend recent scientific and medical progress This volume focuses attention on one of the numerous topics of interest within bioethics Specifically an examination is made of the implications of the principle of justice for health care Apart from four essays in *Ethics and Health Policy* edited by Robert Veatch and Roy Branson the discussion of justice and health care has been occasional almost nonexistent and scattered The paucity of literature in this area is regrettable but perhaps understandable On the one hand Joseph Fletcher one of the contemporary pioneers in bioethics can hold that distributive justice is the core or key question for biomedical ethics 1 p 102
