be both alive and dead at the same time and a particle can be in two places at once And that particle is also a wave everything in the quantum world can be described in terms of waves or entirely in terms of particles These interpretations were all established by the end of the 1920s by Erwin Schrödinger Werner Heisenberg Paul Dirac and others But no one has yet come up with a commonsense explanation of what is going on In this concise and engaging book astrophysicist John Gribbin offers an overview of six of the leading interpretations of quantum mechanics Gribbin calls his account agnostic explaining that none of these interpretations is any better or any worse than any of the others Gribbin presents The Copenhagen Interpretation promoted by Niels Bohr and named by Heisenberg The Pilot Wave Interpretation developed by Louis de Broglie The Many Worlds Interpretation The Decoherence Interpretation The Ensemble Non Interpretation The Timeless Transactional Interpretation which theorized waves going both forward and backward in time All of these interpretations are crazy Gribbin warns and some are more crazy than others but in the quantum world being more crazy does not necessarily mean more wrong

McVoy, 2013-11-11 A NATO Advanced Studies Institute was held June 12-23 1978 at the University of Wisconsin in Madison Wisconsin It was a topical Institute in theoretical nuclear physics and had the somewhat novel feature of focussing not on a single topic but on two closely allied ones pion nucleus and heavy ion physics These two fields both dedicated to the investigation of short wave length properties of nuclei have many techniques and concepts in common and essentially become one in the topic of relativistic heavy ion physics The purpose of including both in a single Institute was to encourage the practitioners in each of these fields to learn from those in the other to judge from the liveliness of the questioning which ensued the purpose was well served indeed Because the Institute was viewed as one which served both educational and research ends the lecturers took particular pains to develop their subjects in a careful coherent sequence The result is a compendium of advanced techniques and current results in these two rapidly expanding fields of nuclear theory which should serve interested physicists as an ideal introduction to the fields In addition to the support provided by the Scientific Affairs Division of NATO substantial financial assistance was provided by the U S National Science Foundation and the Graduate School of the University of Wisconsin
