Songs For Gaia:

Songs for Gaia Brian Lee, 2005-01-01 **Gary Snyder's Sense of Place** Sharon Paquin-Staple, 1982 Songs of Gaia Julie Tara, 2015-05-05 In our world today there is a yearning to connect to beauty a rising tide of sensitivity and awareness of the immense difficulties we are facing a need to find a sense of redemption Poetry offers this It opens the window to paradox giving voice to both the souls grief and its longing for the ecstatic Julie Taras poetry falls in the tradition of the mystical poets who through the magic of words open the eye and the soul to the awareness of the infinite of timelessness of presence To enter into Songs of Gaia is to enter into a world where the desert wind becomes a wild woman's breath where the rivers you've drunk deeply from become the blood of the Mother's veins and where the sound of your beating heart becomes the rhythm of the very universe in which you live *Songs for Gaia* Steven Klett, 2017 **Songs for Gaia** Gary Snyder, 1979

Literature, Nature, and Other Patrick D. Murphy, 1995-02-01 The book first establishes a theoretical framework for conceptualizing environmental analysis It then develops a conception of environmental literature with an emphasis on works by women arguing for the need to reconceptualize woman nature and nature culture associations and critiquing the problems of male poetic sex typing of the planet Murphy also elaborates on specific works and authors with an emphasis on literary texts by Hampl Harjo Snyder and Le Guin Additionally he treats issues of canon and pedagogy as well as the possibility of agency in a postmodern era Ranging across diverse fields and incorporating cultural studies post structuralist literary theory and ecofeminist philosophy Literature Nature and Other both defines and critiques the current terrains of literary ecocriticism and nature writing environmental literature Literary examples are drawn from fiction poetry and prose including postmodern metanarratives and works by Native Americans and Chicanas *Starlight Starbright: Are Stars Conscious?* *Second Edition* Greg Matloff, C Bangs, 2020-05-07 The only thing we can be absolutely sure of is our own consciousness But what is consciousness Is it a property that is unique to humans or do we share it with other lifeforms Or is the philosophical doctrine of panpsychism correct are stars and the entire universe conscious in some sense Early chapters in this book examine the prehistory mythology and history of this topic Arguments are presented from the viewpoints of shamans philosophers poets quantum physicists and novelists A simple toy model of panpsychism is then presented in which a universal field of proto consciousness interacts with molecular bonds via the vacuum fluctuation pressure of the Casimir Effect It is shown how this model is in congruence with an anomaly in stellar motions called Parenago's Discontinuity Cooler less massive stars such as the Sun apparently circle the center of the galaxy faster than their hotter bluer more massive sisters This discontinuity occurs at the point in the stellar distribution where molecules begin to appear in stellar spectra As described in the first edition of this book observations of main sequence stars out to 260 light years and giant stars out to 1 000 light years using the ESA Hipparcos space observatory support the reality and non locality of Parenago's Discontinuity Local more conventional explanations for this phenomenon are not supported by observations of other galaxies

and the spiral arms of the Milky Way Since 2014 the new ESA Gaia space observatory has been obtaining kinematics and position data for 1 billion stars in our galaxy The first Gaia data release in 2016 has been used in 2018 by a Russian team to demonstrate Parenago's Discontinuity for a large stellar sample out to 500 light years from the Sun These observations support the hypothesis that anomalous stellar motion is due to stellar convection as described by philosopher author Olaf Stapledon in his classic novel *Star Maker* as previously discussed by the author in the peer reviewed *Journal of the British Interplanetary Society JBIS* In light of the new Gaia observations and work by other researchers it is not impossible that pansychism is emerging from the realm of philosophy as a new subdivision of observational astronomy Simple models of universal proto consciousness may be subject to inductive tests using current and future space observatories A special feature of this book is the chapter frontispiece art by C Bangs

Gaia's Web Karen Bakker, 2024-04-16 A riveting exploration of one of the most important dilemmas of our time will digital technology accelerate environmental degradation or could it play a role in ecological regeneration At the uncanny edge of the scientific frontier Gaia's Web explores the promise and pitfalls the Digital Age holds for the future of our planet Instead of the Internet of Things environmental scientist and tech entrepreneur Karen Bakker asks why not consider the Internet of Living Things At the surprising and inspiring confluence of our digital and ecological futures Bakker explores how the tools of the Digital Age could be mobilized to address our most pressing environmental challenges from climate change to biodiversity loss Interspersed with ten elegiac enigmatic parables each of which is based on an existing technology Gaia's Web evokes the conundrums we face as the World Wide Web intertwines with the Web of Life A new generation of innovators is deploying digital technology to come to the aid of the planet using spy satellites to track down environmental criminals inviting animals to the Metaverse and biohacking Frankenstein like biobots as environmental sentinels But will they end up doing more harm than good In an engaging take on conservation technology

Bakker looks at the digital tech applications to environmental issues from predatory harvesting of environmental data to human bycatch and eco surveillance capitalism. If we address these issues and mobilize digitally mediated forms of citizen science, she argues, digital tech could help reverse environmental harms and advance environmental sustainability. And in the process, Big Tech might be transformed for the better. With its uniquely broad scope combining insights from computer science, ecology, engineering, environmental science, and environmental law, Gaia's Web introduces profoundly novel ways of addressing our most pressing environmental challenges: mitigating climate change, protecting endangered species, and creating new possibilities for ecological justice by empowering nonhumans to participate in environmental regulation.
