Sons Of Liberty The Masculine Mind In Nineteenth Century America:

Sons of Liberty David Pugh, 1983-12-02 David G Pugh examines the evolution and shape of the cult of masculinity in nineteenth century America The author contends that the men of the time had been cut loose from their traditional cultural moorings and required a leader with strength endurance and bravado They sought these mythical Jacksonian qualities as a defense against aimless drifting and the anonymity and real dangers of the frontier Attitudes of nineteenth century men toward women and heterosexuality are revealed as a web of sexual anxieties repression and sublimation that fostered the conviction that manliness could best be achieved through independence from women Pugh then assesses the impact of the Jacksonian legacy on the latter half of the century and demonstrates that our modern conceptions of manliness and masculinity are deeply rooted in nineteenth century prototypes

Mothers and Daughters in Nineteenth-Century

America Nancy M. Theriot, 2014-10-17 The feminine script of early nineteenth century centered on women s role as patient long suffering mothers By mid century however their daughters faced a world very different in social and economic options and in the physical experiences surrounding their bodies In this groundbreaking study Nancy Theriot turns to social and medical history developmental psychology and feminist theory to explain the fundamental shift in women s concepts of femininity and gender identity during the course of the century from an ideal suffering womanhood to emphasis on female control of physical self Theriot s first chapter proposes a methodological shift that expands the interdisciplinary horizons of women s history She argues that social psychological theories recent work in literary criticism and new philosophical work on subjectivities can provide helpful lenses for viewing mothers and children and for connecting socioeconomic change and ideological change She recommends that women s historians take bolder steps to historicize the female body by making use of the theoretical insights of feminist philosophers literary critics and anthropologists Within this methodological perspective Theriot reads medical texts and woman authored advice literature and autobiographies She relates the early nineteenth century notion of true womanhood to the socioeconomic and somatic realities of middle class women s lives particularly to their experience of the new male obstetrics The generation of women born early in the century in a close mother daughter world taught their daughters the feminine script by word and action Their daughters however the first generation to benefit greatly from professional medicine had less reason than their mothers to associate womanhood with pain and suffering The new concept of femininity they created incorporated maternal teaching but altered it to make meaningful their own very different experience This provocative study applies interdisciplinary methodology to new and long standing questions in women s history and invites women s historians to explore alternative explanatory frameworks
