Fisher, 2014-02 Music Piety and Propaganda The Soundscapes of Counter Reformation Bavaria explores the nature of sound as a powerful yet ambivalent force in the religious struggles that permeated Germany during the Counter Reformation Author Alexander J Fisher goes beyond a musicological treatment of composers styles and genres to examine how music and more broadly sound itself shaped the aural landscape of Bavaria as the duchy emerged as a militant Catholic bulwark Fisher focuses particularly on the ways in which sound including bell ringing gunfire and popular song as well as cultivated polyphony not only was deployed by Catholic secular and clerical elites to shape the religious identities of Bavarian subjects but also carried the potential to challenge and undermine confessional boundaries Surviving literature archival documents and music illustrate the ways in which Bavarian authorities and their allies in the Catholic clergy and orders deployed sound to underline crucial theological differences with their Protestant antagonists notably the cults of the Virgin Mary the Eucharist and the saints Official and popular rituals like divine worship processions and pilgrimages all featured distinctive sounds and music that shaped and reflected an emerging Catholic identity Although officials imposed a severe regime of religious surveillance the Catholic state's dominance of the soundscape was hardly assured Fisher traces archival sources that show the resilience of Protestant vernacular song in Bavaria the dissemination and performance of forbidden anti Catholic songs the presence of Lutheran chorales in nominally Catholic church services into the late 16th century and the persistence of popular noise more generally Music Piety and Propaganda thus reveals

historical theological and cultural issues of the period through the piercing dimension of its sounds bringing into focus the import of sound as a strategic cultural tool with significant impact on the flow of history **In Style, Book 2** Joyce Grill, Each easy to memorize piece in this collection will prepare students with the technique and musicianship skills necessary to play music by master composers A valuable glossary defines the styles of the bagatelle mazurka nocturne scherzo toccata and prelude and assists the student in accomplishing a historically and stylistically appropriate performance with a special emphasis on romantic period styling and interpretation A Guide to Piano Music by Women Composers Pamela Y. Dees, 2002-02-28 Designed as a practical reference guide for professional pianists and piano teachers A Guide to Piano Music by Women Composers Volume I is an annotated catalogue of the available piano music in print composed by 144 women born before the 20th century The work also features biographies and extensive bibliographical information for each composer Arranged alphabetically by composer into categories including single works collections and anthologies the music is also described in terms of grade level genre mood style characteristics and technical requirements and ranges in difficulty from late elementary to virtuoso concert repertoire Far too many teachers students professional musicians and audiences are unaware of the contributions made by women in music and of the beauty and merit of their specific compositions This reference work provides an invaluable addition to the current literature
