How Far the Promised Land? Jonathan Rosenberg, 2018-06-05 *How Far the Promised Land* explores the relationship between overseas developments and the most important reform movement in modern American history: the struggle for racial justice. Interweaving civil rights history, U.S. foreign relations history, and twentieth-century international history, the book

contributes to the emerging effort to reconceptualize the study of America's past by locating it in a global context. In examining the link between international developments and the quest for racial justice, Jonathan Rosenberg argues that civil rights leaders were profoundly interested in the world beyond America and incorporated their understanding of overseas matters into their reform program in order to fortify and legitimize the message they presented to their followers, the nation, and the international community. The book considers how a cosmopolitan group of black and white male and female race reform leaders purposively deployed World War I and the peace settlement, the decolonization struggles in Africa and Asia, the emergence of communism and fascism, World War II, and the Cold War to help realize their domestic aspirations. Rosenberg sets this complex story against the backdrop of America's growing activism on the world stage, a development that would have significant positive implications for the domestic struggle. Central to the work is the notion that race reform leaders were animated by the idea of color-conscious internationalism, a distinctive outlook that would affect the trajectory and momentum of the civil rights movement.

The Urban Geography of Boxing, Benita Heiskanen, 2012-05-31. This book is an interdisciplinary cultural examination of twenty-first century boxing as a professional sport, a bodily labor, a lucrative business, a popular entertainment, and an instrument of ideology. Based on ethnographic fieldwork and interviews conducted with Latino boxers, women boxers, and boxing insiders in Texas, it discusses boxing from the vantage point of the sundry players who are involved with it: the labor force, promoters, handlers, ringside officials, medical professionals, media, and the audiences. The various parties have multiple stakes in the sport. For some, boxing is about physical empowerment; others are in it for the money; some deploy it for ideological purposes; yet others use it to claim their 15 minutes of fame. And frequently, the various interests overlap. In this book, Benita Heiskanen makes a broader connection between boxing and the spatial organization of racialized, class-based, and gendered bodies within particular urban geographies. Journeying actual sites where the sport is organized, such as the barrio boxing gym and competition venues, she maps the ways in which boxing insiders negotiate a variety of conflicting agendas at local, regional, and national scales. Beyond the United States, the worker-athletes conduct their labor within global socioeconomic conditions, business networks, and legal principles. Through this sporting context, Heiskanen's discussion discloses some complex socio-historical, cultural, and political power relations between urban margins and centers, with ramifications far beyond boxing. This book will be of interest to readers in Sport Studies, Cultural Studies, Cultural Geography, Gender Studies, Critical Race Theory, Labor Studies, and American Studies.
