Suicides In Prison:

Suicides in Prison Alison Liebling, 2002-09-11 First published in 1992 Routledge is an imprint of Taylor Francis an informa company

Suicide and Self-injury in Prison Charles Lloyd, 1990 Includes a bibliography

Suicide and Self-Harm in Prisons and Jails Christine Tartaro, David Lester, 2010-07-12 Police and corrections personnel must always be mindful of the possibility that those in their custody may attempt suicide or commit an act of self mutilation Persons housed in prisons jails and police lockups tend to be at a higher risk for such destructive behavior than members of the general population Reasons for this can be found by examining the mental health substance abuse and physical sexual abuse histories of inmates in addition to deficits in their coping skills and the stress and uncertainty generated by incarceration This book explores several topics pertaining to suicide and deliberate self harm in the corrections setting including who tends to commit these acts where when and how these incidents occur screening mechanisms the role of environmental stimuli in facilitating or preventing acts of self harm interpersonal relations among inmates and between inmates and staff and the role of the courts in setting and ruling on suicide prevention policies The authors discuss the role of prevention techniques that offer a balance between strict opportunity reduction and softer motivation reduction strategies The book also includes suggestions for diversion programs that can keep mentally ill inmates out of prisons and jails and transition planning programs to better prepare outgoing inmates for their re entry into the community

Suicide Behind Bars David Lester, Bruce L. Danto, 1993

Report on Suicides in Prison James Hennessy, Great Britain. Her Majesty's Chief Inspector of Prisons for England and Wales, 1984

Prison Suicide Lindsay M. Hayes, 1998-12 Until recently it has been assumed that suicide although a problem for jail inmates as they face the initial crisis of incarceration is not a significant problem for inmates who advance to prison to serve out their sentences This monograph was produced to fill a critical void in the knowledge base about prison suicide In addition to a thorough review of the literature and of national and state standards for prevention it offers the most recent national data on the incidence and rate of prison suicide effective prevention programs and discussion of liability issues References appendices and tables

The Prevention of Suicide in Prison Daniel Pratt, 2015-08-27 Suicide is considered to be the leading cause of preventable death in prisons While there is increasingly expansive literature examining the various risk factors associated with a likelihood of eventual prison suicide so far this has struggled to lead to successful prevention programmes An alternative approach is needed that seeks to understand at the individual level what leads a prisoner to contemplate ending their own life This book describes how the authors developed and delivered evidence based psychological interventions for suicide prevention in prison The authors present a compelling argument for a psychological approach to the prevention of prison suicide drawing upon a cognitive behavioural perspective with chapters investigating two novel psychological therapies Cognitive Behavioural Suicide Prevention and Problem Solving Training The methodology behind each study is presented alongside preliminary findings emerging from the evaluations and

detailed case studies are included as exemplars of the process and content of the therapies as well as the individual and contextual challenges to be overcome. The book provides timely research into the development of a better understanding of why prisoners engage in suicide behaviour and the preventive interventions showing the most promise for future investigation. The Prevention of Suicide in Prison will be critical reading for clinical and forensic psychologists, psychological therapists, psychiatrists and other mental health staff working within a prison context as well as postgraduates in training and researchers studying suicide in forensic settings.

Dying Inside Samantha Sherratt, 1993 *Adolescent Forensic Psychiatry* Susan Bailey, Mairead Dolan, 2004-06-25

Adolescent Forensic Psychiatry discusses a broad range of issues based around the psychiatric needs of adolescents and how these relate to offending behaviour. Its well structured approach looks at assessment, treatment and outcomes for different disorders and highlights the importance of effective interaction between specialist agencies. Services supporting the assessment and treatment of children and young people within forensic mental health services are influenced by professionals in many areas; the author base covers a wide range of disciplines and specialties to cover every aspect of adolescent forensic psychiatry. *Adolescent Forensic Psychiatry* will be of special interest to people working with children and young people in secure care and to those working with all looked after children. It will be of value to all those involved in the development of the needs of children and adolescents within educational, social, mental health and criminal justice services.

The Health of Prisoners Richard Creese, J. Bearn, 1995

In eighteenth century Britain gaols were places of temporary confinement where inmates stayed while awaiting punishment. With the rise of the penitentiary from the early nineteenth century, custodial institutions housed prisoners for much longer periods of time. Prisoners were supposed to be reformed as well as punished during their incarceration. From at least the time of John Howard (1726-1790) the health of prisoners has been part of the concern of philanthropists and others concerned with the wider functions of prisons. The Victorians established a Prison Medical Service and members of the medical profession have long been involved in caring for the mental and physical needs of prisoners. For two centuries, prison overcrowding has been identified as a major cause of mortality and morbidity in prisons. Historical debates thus often have a modern ring to them which make the essays in this volume particularly timely.
