Exercises in Practical Astronomy M.T Buck, 2017-11-13 Offering a series of well defined problems supplemented by solutions Exercises in Practical Astronomy Using Photographs presents meaningful practical work in elementary astronomy and astrophysics The book provides authentic astronomical photographs of very high quality on which different types of objects can be studied with equipment as simple as rulers and protractors In addition to photographs and a set of exercises that cover 12 topics the coverage includes ample hints and worked solutions that are designed to enable students to work independently SI units are used for physical data and in conversions of astronomical quantities This book is one of the few to use real rather than idealized or simplified data in the problems Celestial Navigation Exercises for Class and Home study Dominique F. Prinet, 2016-01-15 About the Manual Celestial Navigation Exercises for Class and Home Study was designed to facilitate the work of instructors using the free PowerPoint slide presentation available at [CelestialNavigationBook.com](http://CelestialNavigationBook.com) This exercise manual available in hard copy and in PDF format for tablets reproduces the questions posed at regular intervals throughout the slide presentation it provides the work forms guiding the calculations and the solutions Students taking a course from an instructor who follows the slide presentation will normally have the associated course book Celestial Navigation using the Sight Reduction Tables Pub No 249 In order to facilitate the download process the free version of the exercise manual available for download from [CelestialNavigationBook.com](http://CelestialNavigationBook.com) includes neither the Almanac nor the Sight Reduction Tables required for the calculations because these tables are identical to the ones in the course book This complete version of the exercise manual with all the required data tables in the appendix will thus be useful mostly to navigators who do not have the course book but wish to practice on their own as well as to students who follow the presentation and have the course book but do not wish to download and print 140 pages of questions and answers
