Sun To The Earth Beyond Panel Reports:

The Sun to the Earth and Beyond National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Solar and Space Physics, Solar and Space Physics Survey Committee, 2003-12-17 This volume *The Sun to the Earth and Beyond Panel Reports* is a compilation of the reports from five National Research Council NRC panels convened as part of a survey in solar and space physics for the period 2003-2013. The NRC's Space Studies Board and its Committee on Solar and Space Physics organized the study. Overall direction for the survey was provided by the Solar and Space Physics Survey Committee whose report *The Sun to the Earth and Beyond: A Decadal Research Strategy in Solar and Space Physics* was delivered to the study sponsors in prepublication format in August 2002. The final version of that report was published in June 2003. The panel reports provide both a detailed rationale for the survey committee's recommendations and an expansive view of the numerous opportunities that exist for a robust program of exploration in solar and space physics.

Priorities in Space Science Enabled by Nuclear Power and Propulsion National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, Committee on Priorities for Space Science Enabled by Nuclear Power and Propulsion, 2006-03-20 In 2003 NASA began an R & D effort to develop nuclear power and propulsion systems for solar system exploration. This activity, renamed Project Prometheus in 2004, was initiated because of the inherent limitations in photovoltaic and chemical propulsion systems in reaching many solar system objectives. To help determine appropriate missions for a nuclear power and propulsion capability, NASA asked the NRC for an independent assessment of potentially highly meritorious missions that may be enabled if space nuclear systems became operational. This report provides a series of space science objectives and missions that could be so enabled in the period beyond 2015 in the areas of astronomy and astrophysics, solar system exploration, and solar and space physics. It is based on but does not reprioritize the findings of previous NRC decadal surveys.

in those three areas **Space Studies Board Annual Report 2010** National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, 2011-01-01 The Space Studies Board SSB was established in 1958 to serve as the focus of the interests and responsibilities in space research for the National Academies The SSB provides an independent authoritative forum for information and advice on all aspects of space science and applications and it serves as the focal point within the National Academies for activities on space research It oversees advisory studies and program assessments facilitates international research coordination and promotes communications on space science and science policy between the research community the federal government and the interested public The SSB also serves as the U S National Committee for the International Council for Science Committee on Space Research COSPAR This volume reviews the organization activities and reports of the SSB for the year 2010 *Space Studies Board Annual Report 2009* National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, 2010-01-01 The Space Studies Board SSB was established in 1958 to serve as the focus of the interests and responsibilities in space research for the National Academies The SSB provides an independent authoritative forum for information and advice on all aspects of space science and applications and it serves as the focal point within the National Academies for activities on space research It oversees advisory studies and program assessments facilitates international research coordination and promotes communications on space science and science policy between the research community the federal government and the interested public The SSB also serves as the U S National Committee for the International Council for Science Committee on Space Research COSPAR The present volume reviews the organization activities and reports of the SSB for the year 2009

Principal-Investigator-Led Missions in the Space Sciences National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Principal-Investigator-Led Missions in the Space Sciences, 2006-04-22 Principal Investigator Led PI led missions are an important element of NASA's space science enterprise While several NRC studies have considered aspects of PI led missions in the course of other studies for NASA issues facing the PI led missions in general have not been subject to much analysis in those studies Nevertheless these issues are raising increasingly important questions for NASA and it requested the NRC to explore them as they currently affect PI led missions Among the issues NASA asked to have examined were those concerning cost and scheduling the selection process relationships among PI led team members and opportunities for knowledge transfer to new PIs This report provides a discussion of the evolution and current status of the Piled mission concept the ways in which certain practices have affected its performance and the steps that can carry it successfully into the future The study was done in collaboration with the National Academy of Public Administration Assessment of NASA's Mars Architecture 2007-2016 National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee to Review the Next Decade Mars Architecture, 2006-09-21 The United States and the former Soviet Union have sent spacecraft to Mars as early as 1966 with Mars exploration being priority for

NASA spacecraft Both sides however have failed as well as succeed The inability to determine if life exists on Mars is considered one of NASA's failures and undercut political support for additional Mars missions in the U S until the launch of the Mars Observer in 1992 Thus the exploration of life on Mars continues but with a new approach Assessment of NASA's Mars Architecture 2007 2016 is an assessment by the Committee to Review the Next Decade Mars Architecture of the National Research Council NRC conducted by request of Dr Mary Cleave NASA's Associate Administrator for the Science Mission Directorate The Committee addresses the following questions Is the Mars architecture reflective of the strategies priorities and guidelines put forward by the National Research Council's solar system exploration decadal survey and related science strategies and NASA plans Does the revised Mars architecture address the goals of NASA's Mars Exploration Program and optimize the science return given the current fiscal posture of the program and Does the Mars architecture represent a reasonably balanced mission portfolio After several months of study consideration and incorporation of the guidance from NRC studies especially New Frontiers in the Solar System and the Vision for Space Exploration community consultations via individual inputs and a MEPAG sponsored working group a plan was created This report includes the plan which has an Astrobiology Field Laboratory or two Mild Rovers mission planned for 2016 recommendations from the committee NRC guidelines for mars exploration and more

Exploration of the Outer Heliosphere and the Local Interstellar Medium National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Solar and Space Physics, 2004-11-25 This report is the summary of a workshop held in May 2003 by the Space Studies Board's Committee on Solar and Space Physics to synthesize understanding of the physics of the outer heliosphere and the critical role played by the local interstellar medium LISM and to identify directions for the further exploration of this challenging environment

The Astrophysical Context of Life National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Origins and Evolution of Life, 2005-06-25 In 1997 the National Aeronautics and Space Administration NASA formed the National Astrobiology Institute to coordinate and fund research into the origins distribution and fate of life in the universe A 2002 NRC study of that program Life in the Universe An Assessment of U S and International Programs in Astrobiology raised a number of concerns about the Astrobiology program In particular it concluded that areas of astrophysics related to the astronomical environment in which life arose on earth were not well represented in the program In response to that finding the Space Studies Board requested the original study committee the Committee on the Origins and Evolution of Life to examine ways to augment and integrate astronomy and astrophysics into the Astrobiology program This report presents the results of that study It provides a review of the earlier report and related efforts a detailed examination of the elements of the astrobiology program that would benefit from greater integration and augmentation of astronomy and astrophysics and an assessment of ways to facilitate the integration of astronomy with other
