The Hospital Neurology Book Arash Salardini, Jose Biller, 2016-04-22. A practical protocol-oriented guide to the practice of neurology in the hospital setting. A Doody's Core Title for 2019. Hospital neurology is one of the fastest growing subspecialties within neurology. Running an efficient and effective neurohospitalist line is important to the financial success of hospitals and the physicians employed there. Many neurology patients also have internal medicine problems, and often it is a general hospitalist without neurology training who treats these patients. These physicians sorely need more information on neurology. Conversely, neurologists caring for these patients have only had one year of internal medicine training and require more guidance on medical problems. Given these realities, there is a need for a resource on hospital neurology. With *The Hospital*

Neurology Book Drs Salardini and Biller have created a practical concise and useful work that guides both neurologists and internists in the areas in which their training is currently not sufficient for hospital practice The Hospital Neurology Book features a highly readable format providing information physicians can act upon including recipes and protocols for patient care and question based chapter headings that lead physicians to the exact issue they are dealing with in the moment Each chapter or chapter section as appropriate opens with a case study setting the stage in a highly practical manner and ends with high yield summary points useful for consolidating learning
