The Grundrisse:

Grundrisse Karl Marx, 1993-11-07 Written during the winter of 1857-8 the Grundrisse was considered by Marx to be the first scientific elaboration of communist theory A collection of seven notebooks on capital and money it both develops the arguments outlined in the Communist Manifesto 1848 and explores the themes and theses that were to dominate his great later work Capital Here for the first time Marx set out his own version of Hegel's dialectics and developed his mature views on labour surplus value and profit offering many fresh insights into alienation automation and the dangers of capitalist society Yet while the theories in Grundrisse make it a vital precursor to Capital it also provides invaluable descriptions of Marx's wider ranging philosophy making it a unique insight into his beliefs and hopes for the foundation of a communist state For more than seventy years Penguin has been the leading publisher of classic literature in the English speaking world With more than 1 700 titles Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors as well as up to date translations by award winning translators

Global Political Economy and the Modern State System Tobias Ten Brink, 2014-04-03 In Global Political Economy and the Modern State System Tobias ten Brink contributes to an understanding of the modern state system its

conflicts and its transformation In contrast to the political attractiveness of optimistic theoretical approaches to globalisation this book demonstrates how an analytical approach rooted in Global Political Economy GPE helps to explain both the tendencies towards integration and towards rivalry in international relations By way of a historical reconstruction of different world order phases in the twentieth century ten Brink analyses multiple phase specific variations of socioeconomic and geopolitical conflicts that are significant for the modern capitalist world system Revised edition of Geopolitik Geschichte und Gegenwart kapitalistischer Staatenkonkurrenz Verlag Westf lisches Dampfboot Münster 2008 **The Capital / Logic**

Debate Andy Blunden, 2025-05-26 Here Andy Blunden presents the first of two volumes on how Marx used Hegel's Logic in his Capital In this first volume Blunden reviews the current literature on the topic with detailed reviews of the contribution of 10 authors representing the spectrum of approaches Finding that present day writers fail to understand the Logic and misrepresent Capital as a work of Logic Blunden focuses on the passage in the Logic entitled The Idea of the True which is ignored by every writer in the present day debate The Eye of the Master Matteo Pasquinelli, 2023-10-10 A social history of AI that finally reveals its roots in the spatial computation of industrial factories and the surveillance of collective behaviour What is AI A dominant view describes it as the quest to solve intelligence a solution supposedly to be found in the secret logic of the mind or in the deep physiology of the brain such as in its complex neural networks The Eye of the Master argues to the contrary that the inner code of AI is shaped not by the imitation of biological intelligence but the intelligence of labour and social relations as it is found in Babbage's calculating engines of the industrial age as well as in the recent algorithms for image recognition and surveillance The idea that AI may one day become autonomous or sentient as someone thought of Google's LaMDA is pure fantasy Computer algorithms have always imitated the form of social relations and the organisation of labour in their own inner structure and their purpose remains blind automation The Eye of the Master urges a new literacy on AI for scientists journalists and new generations of activists who should recognise that the mystery of AI is just the automation of labour at the highest degree not intelligence per se **The Bloomsbury Companion to Marx** Andrew

Hegel, Marx, and the Necessity and Freedom Dialectic Russell Rockwell, 2018-04-26 This book provides close readings of primary texts to analyze the linkage between G W F Hegel's philosophy and Karl Marx's critical social theory of necessity and freedom This is important for three reasons first to understand the significance of the changing relationships of work society and critical social theory in the origins of Hegelian Marxism in the US as documented in the recently published correspondence between the Marxist Humanist theoretician Raya Dunayevskaya and the critical theorist Herbert Marcuse second to identify the intersections of the Critical Theorists Jurgen Habermas and Marcuse's influential reinterpretations of Marx's value theory of economy and society that enables navigation of the changing relationships of the social and economic spheres in the last century as developed in Marx's Grundrisse and thirdly to assess the potential of Moishe Postone's renewal of Marx's value theory largely conceived by the notion of a necessity and freedom dialectic intrinsic to capitalism **In the**
