

DEVELOPMENTAL READING

PART I – CONTENT UPDATE

Theoretical Models in Reading

1. **Bottom-up** – depicts reading starting with the input of some graphic signals or stimulus. The role of the reader is to get meaning from the text based on the stimulus or the words used. This is also called data-driven processing. Dechant (1991), citing Gove (1983), claims that the adherents of the **BOTTOM-UP MODEL** of reading put forward the idea that:
 - a) It is imperative for readers to recognize every word in a selection so that they can comprehend it;
 - b) Word and sound-letter cues should be primary tool that readers should use so that they can identify unrecognized words;
 - c) The mastery of a series of word-recognition skills is the primary requirement for reading acquisition;
 - d) Instruction should focus principally on the teaching of letters, letter-sound relationships, and words;
 - e) Accuracy in recognizing words is significant; and
 - f) It is important for readers to have the knowledge of discrete sub-skills.
2. **Top-down** – depicts reading beginning with the cognitive processes occurring in the reader's mind as he or she reads. The role of the reader is to give meaning to the text based on the information already held within the reader's store of though do not recognize each word, they may be able comprehend a selection;

Supporters of the **TOP-DOWN MODEL** of reading, according to Dechant (1991), put forward that:

- a) Even though readers do not recognize each word, they may be able comprehend a selection;
- b) Meaning and grammatical cues primarily assist readers to identify unrecognized words;
- c) The mastery of a series of word-recognition skills takes a back seat the comprehension the use of meaning activities;
- d) The reading of sentences, paragraph, and whole selections should all the principal focal point of instruction;
- e) Reading for meaning is the central objective of reading rather than mastery of letters, letter/sound relationships and words; and
- f) The amount and kind of information obtained through reading is the important aspect of reading.

3. **Interactive** – depicts reading as the process of constructing meaning through the dynamic interaction suggested by the written language, and the context of the reading situation. The third model of reading which the **INTERACTIVE MODEL** is, neither accepts nor rejects the pure and extreme beliefs of the two earlier models. The advocates of this model put forward the idea that:
 - a) Readers process letters and words at the same time as they formulate hypothesis about the meaning of what is on the printed page Dechant, (1991).
 - b) Meaning simultaneously comes from a combination of different sources like logographic

knowledge, graphemic knowledge, phonological knowledge, orthographic knowledge, morphemic knowledge, grapheme-phoneme correspondence, lexical knowledge, semantic knowledge, syntactic knowledge, and schematic knowledge (Dechant, 1991); and

- c) Instruction should give a balanced emphasis to the teaching of whole texts and phonics.

A Reading teacher should be.....

- A. Aware of one's thinking process
- B. Careful in examining one's thinking process of others
- C. Practicing one's thinking abilities

When teachers do these, the learners are expected to benefit from them so that they may also be developed to become *critical, creative, and metacognitive* readers.

The reading teacher should bear in mind that a **CRITICAL** reader:

- Must carefully examine his/her thinking and the thinking of others, in order to clarify and improve own understanding
- Should examine and test suggested solutions to see whether they will work
- Need to test ideas for flaws or defects and must not be inhibited by fear of being aggressive and destructive, nor have fear of retaliation, and over-evaluation
- Should engage in critical thinking activities such as thinking actively, carefully exploring situations with question, thinking for one self, viewing situation from different perspective, and discussing ideas in organized ways.

Critical thinkers are –

- Skeptical (Just because it's in print doesn't mean it is right ;)
- Fact-oriented (Give me the facts and convince me that they are the relevant ones)
- Analytic (How has the work been organized? What strategies has the writer used?)
- Open-minded (Be prepared to listen to different points of view; do not be restricted by personal biases)
- Questioning (What other conclusions could be supported by the evidence?)
- Creative (What are some entirely different ways of looking at the problem or issue?)
- Willing to take stand (Is the argument convincing? What is my position on the issue?)
- Those who show the ability to separate fact from opinion; recognizes propaganda techniques, compares different sources of information; recognizes important missing information; draws inferences that are not explicitly stated, and identifies the author's background and purpose

The reading teacher should take into consideration that a **CREATIVE** reader:

- Uses his/her cognitive processes to develop ideas that are unique, useful, and worthy of further elaboration
- Discovers a new or improved solution to a problem, or a set of new ideas
- Organizes ideas in different ways, and makes unusual comparisons
