

The New Urban Reality

John O'Loughlin, Jürgen Friedrichs

The New Urban Reality:

The New Urban Reality Paul E. Peterson, 2001-06-07 America's inner cities particularly those in older industrial metropolitan areas have declined sharply in both population and employment over the past two decades How much of this change is due to technological advances in transportation communication and manufacturing How much of it is due to the changing racial composition of the central cities Can any set of public policies retard or reverse the decline of the industrial cities This book presents an interdisciplinary collection of papers addressing these questions In the introduction editor Paul E Peterson discusses the ways in which adverse economic and racial changes interact and urges more realistic federal policies to counteract these changes In Part I The Processes of Urban Growth and Decline sociologist John D Kasarda analyzes the growing mismatch between inner city jobs and residents and geographer Brian J L Berry discusses the economics of inner city gentrification Racial change is the subject of Part II sociologist Elijah Anderson depicts race relations in a gentrifying inner city neighborhood sociologist William J Wilson delineates the social and economic problems of inner city blacks and political scientist Gary Orfield calls for bold efforts to reverse the continuing urban pattern of racial segregation Part III looks at the way cities have responded to economic and racial change Economist Kenneth A Small discusses the impact of transportation policy political scientist Herbert Jacob finds that increasing efforts to control urban crime have not been effective and sociologist Terry Nichols Clark emphasizes the effect of political factors on the fiscal condition of cities Economist Anthony Downs reviewing the issues raised by the other authors sees little hope for racial integration as the central social strategy for solving urban problems but does see hope in the internal resources of America's minority communities

The New Urban Frontier Neil Smith, 2005-10-26 Why have so many central and inner cities in Europe North America and Australia been so radically revamped in the last three decades converting urban decay into new chic Will the process continue in the twenty first century or has it ended What does this mean for the people who live there Can they do anything about it This book challenges conventional wisdom which holds gentrification to be the simple outcome of new middle class tastes and a demand for urban living It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century Documenting in gritty detail the conflicts that gentrification brings to the new urban frontiers the author explores the interconnections of urban policy patterns of investment eviction and homelessness The failure of liberal urban policy and the end of the 1980s financial boom have made the end of the century city a darker and more dangerous place Public policy and the private market are conspiring against minorities working people the poor and the homeless as never before In the emerging revanchist city gentrification has become part of this policy of revenge

Religion and Community in the New Urban America Paul D. Numrich, Elfriede Wedam, 2015-04-14 Through an in depth study of fifteen Chicago congregations Catholic parishes Protestant churches Jewish synagogues Muslim mosques and a Hindu temple city and suburban neighborhood based and commuter this book describes congregational life

and measures the influences of those congregations on urban environments The New Urban Condition Leandro Medrano, Luiz Recamán, Tom Avermaete, 2021-04-07 This book explores new architectural and design perspectives on the contemporary urban condition While architects and urban designers have long maintained that their actions drawings and buildings are post critical this book seeks to expand the critical dimension of architecture and urbanism In a series of historical and theoretical studies this book examines how the materialities forms and practices of architecture and urban design can act as a critique towards the new urban condition It proposes not only new concepts and theories but also instruments of analysis and reflection to better understand the current counter hegemonic tendencies in both disciplinary strategies and appropriation tactics The diversely international selection of chapters from Brazil Portugal Spain Sweden the United States and the Netherlands combine different theoretical and empirical perspectives into a new analysis of the city and architecture Demonstrating the need for new critical urban and architectural thinking that engages with the challenges and processes of the contemporary urban condition this volume will be a thought provoking read for academics and students in architecture urban design geography political science and more **The Greatest of Evils** Joel A. Devine, James David Wright, The debate on persisting poverty in the United States somewhat dampened for the past decade has now been fully rekindled Devine and Wright have entered that debate with an analysis that is both quantitative and qualitative informed on the one side by urban ethnography and steeped in official statistics and relevant data on the other The result is an incisive and cogently documented narrative account leading to policy recommendations for a new president and a new era In *The Greatest of Evils* Devine and Wright develop three principal themes First they argue that poverty is by no means monolithic each subgroup within the population in poverty tends to have different problems Secondly the so called underclass within the poverty population represents a new and especially corrosive development one that cannot be analyzed in traditional terms nor dealt with in traditional ways Thirdly the War on Poverty of the Sixties was not the unmitigated disaster that so many have come to believe and offered a boldness of vision that today's poverty policies tend to lack In exploring these themes the authors show how the social and economic costs of poverty related problems exceed what it will cost to find remedies that address the underlying causes of residual poverty *People and Politics in Urban America, Second Edition* Robert W. Kweit, Mary G. Kweit, 2013-11-26 First Published in 1998 Approximately 75 percent of Americans live in cities and surrounding suburbs and the characteristics of those cities inescapably affect the quality of their lives This book examines the extent to which these Americans use the political process to control the characteristics of life in their metropolises In addition this second edition revision places great emphasis on the role of political leaders while recognising the interdependence between those leaders and various interests in the city Social Polarization in Post-Industrial Metropolises John O'Loughlin, Jürgen Friedrichs, 2015-08-17 No detailed description available for Social Polarization in Post Industrial Metropolises *The City Reader* Richard T. LeGates, Frederic Stout, 2003 This third edition juxtaposes the very

best publications on the city It reflects the latest thinking on globalization information technology and urban theory It is a comprehensive mapping of the terrain of urban studies old and new

Gentrification in Chinese Cities Qinran Yang, 2022-05-20 This book provides an institutional interpretation of state facilitated gentrification in Chengdu an emerging central city of China It generalizes the three aspects of institutional changes in the cultural economic and social spheres that have thus far directed the operation of gentrification in the transitional economy the creative destruction of consumption spaces the spatial production of excess and the unequal redistribution of spatial resources to low income residents The interactions of state and society are examined in navigating the institutional changes and forming the Chinese distinctions of gentrification The author argues that these three aspects of institutional changes characterize gentrification in Chengdu as a transformative force of development led by the state and capitalists and championed by middle class consumers This gentrification mode periodically catalyzes new spaces and collective cultures which then necessitate the stimulation of new consumption behaviors and the formation of new consumer classes at the expense of the spatial demands for the even larger number of low income residents However in the context of China s unique state society relations some low income groups may also ride the wave of social transformation The author suggests that this type of gentrification integrates into not the essence of uneven geographical development in a capitalist society but China s unique model of urbanization and development which is often state driven innovative and even involuted so as to sustain continuous growth Though the research is focused on urban China this book also contributes to methodological issues on gentrification research on a global scale It is skeptical both of the structural explanation and of the revelation of unsorted differences instead it aims to generate midrange regularities of gentrification in Chinese cities Institutional change is treated as an intermediary that on the one hand responds to the global trends and on the other hand adapts to local preconditions Mixed methods including statistical and spatial analysis institutional analysis and an extensive ethnographic study are used to investigate gentrification from a structural perspective a historical perspective and as a grounded process within the locality

Drug Policy and the Decline of the American City Sam Staley, 2017-07-05 The drug trade is a growth industry in most major American cities fueling devastated inner city economies with revenues in excess of 100 billion In this timely volume Sam Staley provides a detailed in depth analysis of the consequences of current drug policies focusing on the relationship between public policy and urban economic development and on how the drug economy has become thoroughly entwined in the urban economy The black market in illegal drugs undermines essential institutions necessary for promoting long term economic growth including respect for civil liberties private property and nonviolent conflict resolution Staley argues that America s cities can be revitalized only through a major restructuring of the urban economy that does not rely on drug trafficking as a primary source of employment and income the inadvertent outcome of current prohibitionist policy Thus comprehensive decriminalization of the major drugs marijuana cocaine and heroin is an important first step toward addressing the economic

and social needs of depressed inner cities Staley demonstrates how decriminalization would refocus public policy on the human dimension of drug abuse and addiction acknowledge that the cities face severe development problems that promote underground economic activity and reconstitute drug policy on principles consistent with limited government as embodied in the U S Constitution and Bill of Rights Designed to cross disciplinary boundaries Staley s provocative analysis will be essential reading for urban policymakers sociologists economists criminologists and drug treatment specialists
