Development, Social Change and Environmental Sustainability Sumarmi,Nanda Meiji,Joan Purwasih,Abdul Kodir,Edo Andriesse,Dorina Ilies,Ken Miichi,2021-06-24 Nowadays the concept of SDGs Sustainable Development Goals is starting to replace the concept of MDGs Millennium Developmental Goals It is a global goal adopted by all United Nations member states It emphasizes the idea that the development of every country can only be achieved by balancing other factors such as social economic and environmental sustainability It is already clear how sustainable development works with environmental ethics and management However there are still issues regarding the sustainable development and human well being Sustainable development should focus on finding a way for society to meet their present needs for the long term without sacrificing the ability of future generations to meet their needs This international seminar provides research results and literature regarding the topic of sustainable development concept the dynamics of sustainable development and social change and environmental sustainability The international seminar entitled 1st International Conference on Contemporary Sociology and Educational Transformation listed speakers from several countries providing an overview on human and environmental resilience This book contains a selection of papers presented at the conference Money, Power, and Elections Rodney A. Smith,2014-04-07 Have campaign finance reform laws actually worked Is money less influential in electing candidates today than it was thirty years ago when legislation was first enacted Absolutely not argues Rodney A Smith in this passionately written fact filled and provocative book According to Smith the laws have had exactly the opposite of their intended effect They have increased the likelihood that incumbents in the House and Senate will be reelected and they have greatly diminished the chances that candidates who are not wealthy will be elected Smith s claims are supported by convincing data he collected and analyzed information about all federal elections since 1920 These data show clearly that money matters now more than ever Smith thinks that reform legislation has created a new inequality for candidates that if left unchecked threatens to destroy the American electoral process by obliterating the foundational principle of free speech He argues that money buys speech and when candidates lack money to buy media time and space they are effectively silenced Their inability to speak freely violates the most significant intentions of our nation s founders that a sovereign citizenry elect its own leaders based on a free exchange of ideas For Smith campaign finance reform has unwittingly

unbalanced the checks and balances created by the Framers of the Constitution After presenting a detailed historical overview of how we have reached the present crisis Smith proposes a simple solution institute a process that completely discloses relevant information about campaign donors and recipients of donations All disclosures would be available to the media which would be able to investigate and report them fully Only then Smith believes will the United States have the opportunity to be the democratic republic that its founders intended Business World ,2003
