Serengeti IV Anthony R. E. Sinclair, Kristine L. Metzger, Simon A. R. Mduma, John M. Fryxell, 2015-05-11 The vast savannas and great migrations of the Serengeti conjure impressions of a harmonious and balanced ecosystem But in reality the history of the Serengeti is rife with battles between human and non human nature In the 1890s and several times since the cattle virus rinderpest at last vanquished in 2008 devastated both domesticated and wild ungulate populations as well as the lives of humans and other animals who depended on them In the 1920s tourists armed with the world s most expensive hunting gear filled the

grasslands And in recent years violence in Tanzania has threatened one of the most successful long term ecological research centers in history Serengeti IV the latest installment in a long standing series on the region s ecology and biodiversity explores the role of our species as a source of both discord and balance in Serengeti ecosystem dynamics Through chapters charting the complexities of infectious disease transmission across populations agricultural expansion and the many challenges of managing this ecosystem today this book shows how the people and landscapes surrounding crucial protected areas like Serengeti National Park can and must contribute to Serengeti conservation In order to succeed conservation efforts must also focus on the welfare of indigenous peoples allowing them both to sustain their agricultural practices and to benefit from the natural resources provided by protected areas an undertaking that will require the strengthening of government and education systems and as such will present one of the greatest conservation challenges of the next century
