The Nile Tributaries Of Abyssinia And The Sword Hunters Of The Hamran Arabs:

The Nile Tributaries of Abyssinia Sir Samuel White Baker, 1867 THE NILE TRIBUTARIES OF ABYSSINIA AND THE SWORD HUNTERS OF THE HAMRAN ARABS Samuel W. Baker, 2024-01-21 *The Nile Tributaries of Abyssinia and the Sword Hunters of the Hamran Arabs* is a book written by Sir Samuel White Baker. This work first published in 1867 details Baker's explorations in the Nile River and its tributaries specifically in the region of Abyssinia, modern-day Ethiopia, and the interactions with the Hamran Arabs, a group of people in the area. Sir Samuel White Baker was a British explorer, naturalist, big game hunter, and abolitionist. In this particular book, he describes his travels and adventures along the rivers and waterways that contribute to the Nile's flow. Baker's expeditions in Africa were notable for their focus on geographical discovery, wildlife observation, and encounters with various African cultures. The Nile Tributaries of Abyssinia, and the Sword Hunters of the Hamran Arabs Samuel White Baker, 1867 *The Nile Tributaries of Abyssinia and the Sword Hunters of the Hamran Arabs* Samuel Baker, 2017-07-22. The work entitled *The Albert Nyanza Great Basin of the Nile* published in 1866 has given an account of the equatorial lake system from which the Egyptian river derives its source. It has been determined by the joint explorations of Speke, Grant, and myself that the rainfall of the equatorial districts supplies two vast lakes, the Victoria and the Albert, of sufficient volume to support the Nile throughout its entire course of thirty degrees of latitude. Thus the parent stream, fed by never-failing reservoirs supplied by the ten months' rainfall of the equator, rolls steadily on its way through arid sands and burning deserts until it reaches the Delta of Lower Egypt. It would at first sight appear that the discovery of the lake sources of the Nile had completely solved the mystery of ages and that the fertility of Egypt depended upon the rainfall of the equator concentrated in the lakes Victoria and Albert; but the exploration of the Nile tributaries of Abyssinia divides the Nile system into two proportions and unravels the entire mystery of the river by assigning to each its due share in ministering to the prosperity of Egypt. **The Nile Tributaries of Abyssinia, and the Sword Hunters of the Hamran Arabs, by Sir Samuel W.
