A Brief History of Painting Roy Bolton, 2013-06-13 The urge to create pictures of our world has been with us ever since early man daubed a fingerful of pigment on a rock or used primitive colours to create exquisite images of the beasts he hunted images so breathtakingly powerful they have never been surpassed however sophisticated we have become This book tells the story of what painting has meant to us and how its role has changed over the centuries In the crisp unstuffy commentary on each of 150 landmark works Christie s art expert Roy Bolton leads us through the development of painting until our own age where painting as a painterly craft has been overtaken by a proliferation of new forms introduced by contemporary art To the question Is the death of painting upon us the introductory chapter by Matthew Collings the multi award winning TV art presenter art historian and cultural critic gives an inspiring answer Painting justifies itself Rather than pathetically struggling to keep up with the new freak show culture of videos and installations painting will only be worth having if it reconnects with its own inner life where the old and the new are the same Roy Bolton s selection takes us from the Ancient World via the Italian Renaissance Rococo and Classicism to Impressionism Modernism and the

Contemporary World Each painting with its context and artist is explained in terms designed to encourage us to judge art for ourselves Written with authority and full of original and helpful insights this is a history of art for our times While I find it interesting to think about all sorts of art I prefer painting to any of it Painting is soulful important serious and humane Matthew Collings We need to de mystify art by stripping it down to its bare essentials then rebuilding it ourselves using our own minds and eyes without all the pompous clutter Roy Bolton

New Zealand in the League of Nations Gerald Chaudron,2011-11-08 When New Zealand s prime minister William Massey joined other heads of British Empire countries in signing the 1919 Treaty of Versailles to end World War I and join the League of Nations he did not regard the act as a declaration of independence On the contrary while Canadian and South African leaders saw membership in the league as a rite of passage towards greater autonomy New Zealand s leader viewed it as an unwelcome burden and a potential threat to the British Empire This history of New Zealand s relations with the League of Nations from its inception in 1920 to its demise in 1946 follows the government s transformation in attitude from its initial hostility to detached acceptance and finally passionate support in the late 1930s By chronicling this complex movement the book traces New Zealand s first tiny halting steps towards developing its own foreign policy

France at War in the Twentieth Century Valerie Holman,Debra Kelly,2000 France experienced four major conflicts in the fifty years between 1914 and 1964 two world wars and the wars in Indochina and Algeria In each the role of myth was intricately bound up with memory hope belief and ideas of nation This is the first book to explore how individual myths were created sustained and used for purposes of propaganda examining in detail not just the press radio photographs posters films and songs that gave credence to an imagined event or attributed mythical status to an individual but also the cultural processes by which such artifacts were disseminated and took effect Reliance on myth so the authors argue is shown to be one of the most significant and durable features of 20th century warfare propaganda used by both sides in all the conflicts covered in this book However its effective and useful role in time of war notwithstanding it does distort a population s perception of reality and therefore often results in defeat the myth making that began as a means of sustaining belief in France s supremacy and later her will and ability to resist ultimately proved counterproductive in the process of decolonization

Pictorial History of the 20th Century, 1995
MUSIC and CAPITALISM Sabby Sagall, 2021-10-06 This book argues that the need for music and the ability to produce and enjoy it is an essential element in human nature Every society in history has produced some characteristic style of music Music like the other arts tells us truths about the world through its impact on our emotional life There is a structural correspondence between society and music The emergence of modern art music and its stylistic changes since the rise of capitalist social relations reflect the development of capitalist society since the decline of European feudalism The leading composers of the different eras expressed in music the aspirations of the dominant or aspiring social classes Changes in musical style not only reflect but in turn help to shape changes in society This book analyses the stylistic changes in music from the emergence of tonality in the late seventeenth century until the Second World War
