New Pioneers Jeffrey Jacob, 2010-11

Practically everyone I know is nursing fantasies about escaping the life they're trapped in and creating one that makes more sense. writes the editor of *Utne Reader* in a recent issue. The people I most admire though are those who actually do it: who break free and pursue a higher calling, no matter how great the risk. *New Pioneers* is about one such group of people: the hundreds of thousands of urban North Americans who over the past three decades have given up their city or suburban homes for a few acres of land in the countryside. Jeffrey Jacob's new pioneers are ordinary people who have tried to break away from the mainstream consumer culture and return to small town and rural America. He traces the development of the movement and identifies seven different kinds of back-to-the-lander: the weekender, country romantic, purist, country entrepreneur, pensioner, micro farmer, and apprentice. From over 1,300 survey responses, interviews, and in-depth case studies at both the regional and national levels of representative back-to-the-landers, Jacob analyzes their values, use of appropriate technology, family division of labor on their acreages, and predisposition toward environmental activism. Jacob finds that back-to-the-landers for the most part are not completely independent of the mainstream economy, and consequently their lives do reflect the contradictions between the available conveniences of a high technology culture and the movement's goals of self-reliant labor. He analyzes their ambivalent attitudes toward technology: hoes and shovels versus mini hydroelectric systems, wood stoves versus microwave ovens, and so on. After examining the experiences of the back-to-the-country people who live on the margins of a postindustrial society, Jacob creates a clearer appreciation of the preconditions necessary to translate the idea of sustainable living into concrete action on a society-wide scale. While *New Pioneers* describes an important social movement, it also shows how far a group of highly motivated individuals and families can go by themselves in breaking away from the prevailing consumer culture. The dilemmas, frustrations, adaptations, and triumphs of these neo-homesteaders offer valuable insights to anyone contemplating a move back to the land.
