The Nuclear Crisis Reader:

The Nuclear Crisis Reader Gwyn Prins, 1984 *The Nuclear Crisis Reader* Gwyn Prins, 1984 *The American Experience in World War II: The atomic bomb in history and memory* Walter L. Hixson, 2003 World War II changed the face of the United States catapulting the country out of economic depression political isolation and social conservatism Ultimately the war was a major formative factor in the creation of modern America This unique twelve volume set provides comprehensive coverage of this transformation in its domestic policies diplomatic relations and military strategies as well as the changing cultural and social arenas The collection presents the history of the creation of a super power prior to during and after the war analyzing all major phases of the U S involvement making it a one stop resource that will be essential for all libraries supporting a history curriculum This volume is available on its own or as part of the twelve volume set *The American Experience in World War II* For a complete list of the volume titles in this set see the listing for *The American Experience in World War II* ISBN 0 415 94028 1 **We All Lost the Cold War** Richard Ned Lebow, Janice Gross Stein, 1995-07-03 Drawing on recently declassified documents and extensive interviews with Soviet and American policy makers among them several important figures speaking for public record for the first time Ned Lebow and Janice Stein cast new light on the effect of nuclear threats in two of the tensest moments of the Cold War the Cuban Missile Crisis of 1962 and the confrontations arising out of the Arab Israeli war of 1973 They conclude that the strategy of deterrence prolonged rather than ended the conflict between the superpowers *The United States and Terrorism* Ron Hirschbein, 2015-04-21 What is terrorism Academics search in vain for the unholy grail the definition of terrorism that will exonerate or condemn American officials There are many vying definitions and no tribunal to resolve the contest In this unique essay Ron Hirschbein analyzes conflicts in which officials themselves called their actions terrorist He reveals that terrorism didn't always get bad press In fact terror bombing was indispensable to winning World War II Not only did the Allied Forces bomb German cities but they also used the nuclear bomb in Japan killing many noncombatant civilians During the Cold War the threat of nuclear annihilation became the strategy to deter war between the superpowers Many ironies are brought to light in revisiting these conflicts such as the fact that it was accepted that safety depended upon the willingness to detonate weapons of mass destruction Not even American citizens enjoyed noncombatant immunity during the Cold War as they were held hostage to mutually assured destruction and marked for sacrifice in various strategic scenarios Indeed their lives were risked in confronting crises in Berlin and Cuba Subsequent conflicts in Korea Vietnam and Iraq as well as the War on Terror itself are also examined Like World War II all involved killing noncombatants by accident or design Casting these conflicts in an ironic light reveals incongruities in language and situations in which triumphant dreams become self-defeating realities as with the second Iraq war The War on Terror now rebranded as an Overseas Contingency Plan seems to be the answer to a Jihadist's prayer Further U S led covert attacks and assassinations by drones raise many discussions of legalities And today the curse

of terrorism is fodder for captivating primetime entertainment enjoyed even by the president of the United States
