From the Foreword by Catherine Rice PhD National Center on Birth Defects and Developmental Disabilities Center for Disease Control and Prevention Autism Spectrum Disorder ASD is a growing health problem and nearly all nurses are likely to care for individuals with ASD. Designed as a textbook and a reference, this volume prepares nurses to recognize the unique challenges of providing evidence-based health care that meets the special needs of ASD patients across the lifespan and in multiple practice settings. It highlights the significant role played by nurses in the treatment of ASD patients and helps nurses integrate the specialized information about ASD into their clinical practice. Each section of the book reflects a different life stage and is organized to include learning objectives and developmental needs at the beginning of a section with key points, a guide to clinical problem solving, and thought-provoking review questions at the end. Key Features: Provides evidence-based information for nurses about the special treatment needs of individuals with ASD.
