The Of Canadian Fishes:

Freshwater Fishes of Canada William Beverley Scott, Edwin John Crossman, 1973 The Fisheries Research Board is proud to present this volume a tribute to the cooperation between the government agency that initiated and supported the work and the research organization that carried it out It is the hope of the authors that this text will perform a useful service by highlighting the lack of information on many aspects of the biology of many Canadian fish species Particularly glaring is our ignorance of the basic life history of many common species

Pacific Fishes of Canada John Lawson Hart, 1973 This book includes the fishes found in salt water off the Canadian coast providing descriptions of 325 kinds of fishes 54 of which are new The arrangement of species follows that proposed by Greenwood et al 1966 as interpreted by Bailey et al 1970 Common names recommended by the latter authors were used when available otherwise names were based on describers recommendations or informal usage Each species account is headed by a common name followed by the scientific name and comments on the derivations of names and their previous use Other information given includes a description of shape fins skin colour largest size recorded features used for recognition and distribution

Synopsis of the Parasites of Fishes of Canada T. E. McDonald, L. Margolis, National Research Council Canada, Pacific Biological Station, 1995 Information on the parasites of Canadian fishes published between the years 1978 and 1993 inclusive is assembled as Parasite Host and Host Parasite lists The 925 named species of parasites are reported on 292 species of Canadian fishes The Parasite Host list is organized on a taxonomic basis and identifies for each species its habitat freshwater marine or brackish site of occurrence in its host s species host s known geographic distribution within Canadian waters and the published source for each host and locality record The Host Parasite list is organized according to the taxonomy of the hosts and is accompanied by data on the known Canadian distribution of the parasites For both the Parasite Host and Host Parasite lists a Remarks section containing explanatory comments concerning systematics nomenclature and notes on other specific items is included as warranted In addition to listing the cited references as supplementary list of references is included to cover other Canadian literature on fish parasites

Guide to the Parasites of Fishes of Canada David I. Gibson, 1984 This guide arranges information on trematode parasites of Canadian fishes by subclass Aspidogastrea and Digenea order superfamily family subfamily and genera No descriptions are included for individual species because of the large number of taxa involved but illustrations of members of each genus are provided Data supplied in the guide include scientific name synonyms the position or organ in the fish where the parasite has been reported hosts distribution in Canadian waters authors responsible for the published records of a particular parasite and comments on the systematics nomenclature records or other aspects of the biology of the parasite Diagnoses are presented for all taxa down to generic level and keys are included down to the species level

Marine Fishes of Arctic Canada Brian W. Coad, James D. Reist, 2018-01-01 Marine Fishes of Arctic Canada is an accessible and up to date study on the diverse marine fish population existing in Canadian waters
