Counselors-in-Training Joel F. Diambra, 2011-01-19 School counseling is a rather specialized field yet students entering it do not have a single comprehensive resource to guide them through the process This text covers all aspects of the practicum and internship experience from the initial contact with your supervisor to detailed descriptions of each of the different roles you will have and will help you gain an understanding of the school culture and how to begin thinking about and developing your own philosophy of school counseling Specific topics covered include popular counseling theories used by school counselors working with special populations of students application of the ASCA ethical standards the administration of day to day tasks such as arranging an office space and managing your time and elements of the guidance curriculum including individual student planning responsive services and systemic support Each chapter contains activities case studies hypothetical situations and worksheets designed to facilitate your understanding of and role in the profession All material presented is consistent with both the CACREP accreditation standards and the American School Counseling Association s National Model Evidence-Based School Counseling Greg Brigman, Elizabeth Villares, Linda Webb, 2017-10-05 Evidence

Self-Regulation and Early School Success Megan M. McClelland, Shauna L. Tominey, 2016-04-08 Self regulation has been identified as an important predictor of school readiness and academic achievement in young children Children who struggle with self regulation are at risk of experiencing peer rejection and academic difficulties Teachers report that there is high variability in children s self regulatory abilities at school entry and that children with an accumulation of risk factors are especially likely to enter school without adequate self regulation skills Moreover early academic skills are often cumulative so children who fail to acquire early skills are at risk of falling behind their peers

academically and facing achievement gaps that widen over time Although the relation between self regulation and school related outcomes has been clearly documented our understanding of the pathways through which self regulation influences early achievement and school success remains unclear This special issue considers previously neglected areas in the current understanding of self regulation The seven articles focus on issues including a the complex relations between self regulation and school readiness b predictors of self regulation and academic achievement and c advances in measurement of self regulation and related skills Research that continues to investigate the complex relations and mechanisms that influence early self regulation and related outcomes will inform policy and practice in ways that help all children develop the self regulation skills they need The volume will be of interest to researchers in the field of child development or education and educators and policy makers who are interested in promoting school readiness and academic success This book was originally published as a special issue of Early Education and Development **Skills for School Success** Anita L.
