Richelle, 2016-04-01 B F Skinner died in August 1990 He had been praised as one of the most influential psychologists of the 20th century but was also attacked by a variety of opponents within and outside the field of psychology This introduction to his work is first of all a guide to a correct reading of his writings a reading devoid of the distortions and misinterpretations often conveyed by many commentators including psychologists It frames Skinner's contributions with reference to major European traditions in psychological sciences namely Pavlov Freud Lorenz and Piaget Crucial aspects of Skinner's theory and methodological stands are discussed in the context of contemporary debates special attention is devoted to the relationship of psychology with biology and the neurosciences to the cognitivist movement to the status of language and to the explanation of novelty and creativity in human behaviour Finally Skinner's social and political philosophy is presented with

an emphasis on the provocative aspects of an analysis of current social practices which fail to solve most of the urgent problems humankind is confronted with today Both in science proper and in human affairs at large Skinner s thought is shown to be not behind as is often claimed but ahead of the times be it in his interactive view of linguistic communication in his very modern use of the evolutionary analogy to explain the dynamics of behaviour or in his vision of ecological constraints
