Small and Medium Enterprises A. S. Bhalla, 1991-11-21 In recent years the potential role of small and medium enterprises SMEs in fostering socio economic development has received increasing attention in the international economic community However no previous works have dealt with the technological capabilities of these enterprises Here A S Bhalla and a distinguished group of contributors fill this gap by presenting a sustained analysis of the technology issues and options facing small and medium enterprises in both urban and rural settings The work is organized around three major issues the policies and programs that affect small and medium enterprises the innovation potential of these businesses and the institutions and infrastructure most conducive to their success in developing and advanced economies Following Bhalla's introduction Part One looks at the macro and microeconomic policy environment necessary to stimulate the innovative capacity and potential of SMEs The contributors show that existing policy measures are invariably geared toward large enterprises and discuss whether removal of these policy biases is enough to promote SME growth or whether more interventionist approaches are needed Part Two focuses on the capacity of SMEs to design and manufacture equipment or products adapting technology to suit their particular requirements The contributors challenge the accepted views in this area demonstrating that even microenterprises have the capacity for product and process innovations In Part Three the contributors examine the success of the business incubation process in fostering technological innovation the traditional forms of support offered to SMEs in developing economies and the linkages between SMEs and research institutions In each section individual chapters examine the operation of SMEs in a variety of settings in both advanced and developing countries Must reading for policymakers and students of international economics Small and Medium Enterprises is a catalyst for informed action in this vital segment of economic activity

Food Security Christopher Stevens,2000 This report deals with an area of overlap between two large areas of study on livelihoods and food security and on international trade and policy Whilst it concentrates on one small element of each of these broad areas and so ignores many questions it does so for a good reason This is to avoid the danger that the WTO agricultural negotiations fail to contribute as strongly as they might to the promotion of food security precisely because the two areas of work and study overlap only at the margins Cross-Border Economic Cooperation Between China and

Small Firms and Innovation Policy in Japan Cornelia Storz,2012-11-15 This new book discusses the extent to which the Japanese economy encourages entrepreneurship and innovation Although Japan has a strong reputation as an innovator some people argue that this reputation is misplaced Contrary to earlier expectations the USA rather than Japan emerged as the leader in the biotech

industries in the 1990s and also many small firms in Japan supply only a few or just one other company thereby limiting their view of the marketplace and the commercial opportunities within it Despite the increase of international patents international scientific citations and a positive technology trade balance the Japanese innovation system is weak in giving birth to radical innovations The book explores fully these issues making comparisons with other countries where appropriate It concludes that the Japanese innovation system has both advantages and disadvantages and contributes to a better understanding of how policy changes take place
