Henry B. Biller, 2002-05-30 Biller integrates research about exercise nutrition and health within an applied developmental psychological framework. Readers are presented with ways of making fitness an enjoyable and positive force in their daily lives. Although a major focus is on how to get in shape, Biller's primary mission is to encourage a healthy lifestyle that enriches self-awareness and personal growth. The goal is not just to facilitate physical fitness but to enhance overall life satisfaction. The book's uniqueness accordingly lies in its ability to help individuals develop a creative, playful approach to fitness in all spheres of their lives. While some readers are just beginning to think about fitness because of a desire to lose weight and improve their appearance, others are more interested in refining their athletic skills or achieving a greater balance in their daily activities. Dedicated exercisers often are striving for new routines and ways to prevent burnout. Many parents, moreover, are searching for activities to help their children as well as themselves become more fit. Older individuals are especially likely to be concerned about staying healthy and avoiding physical dependence as they age. Biller speaks to all these concerns and all these groups by providing an approach to getting in shape that enriches self-understanding and mental vitality. *Health Promotion and Aging* David Haber, 2003 Focusing on research findings and practical applications, the author in this new edition continues to stress the importance of collaboration and communication between health professionals and their clients. The book is based on the premise that health professionals should be health educators.

Healing Logics Erika Brady, 2001-04-01 Scholars in folklore and anthropology are more directly involved in various aspects of medicine such as medical education, clinical pastoral care, and negotiation of transcultural issues than ever before. Old models of investigation that artificially isolated folk medicine, complementary and alternative medicine, and biomedicine as mutually exclusive have proven too limited in exploring the real-life complexities of health belief systems as they observably exist and are applied by contemporary Americans. Recent research strongly suggests that individuals construct their health belief systems from diverse sources of authority including community and ethnic tradition, education, spiritual beliefs, personal experience, the influence of popular media, and perception of the goals and means of formal medicine. *Healing Logics* explores the diversity of these belief systems and how they interact in competing, conflicting, and sometimes remarkably congruent ways. This book contains essays by leading scholars in the field and a comprehensive bibliography of folklore and medicine. *Ride Right with Daniel Stewart* Daniel Stewart, 2015-07-01 Riders are athletes in the truest sense of the word, yet the majority of them fail to treat themselves as such. Most riders would never consider working a horse without first warming it up but fail to treat their own bodies with the same respect. Daniel Stewart's *Ride Right* system will improve rider and horse performance simply by showing riders how to improve themselves. There are three main phases in the *Ride Right* system: Rider biomechanics, the how and why of balance, posture, symmetry, and body awareness; strength

stamina and suppleness The conditioning of the rider's body with specially designed stretching and fitness exercises rider frame of mind Sports psychology relaxation and visualization All these elements together with good health and nutrition will show riders how to excel The Complete Idiot's Guide to Overcoming Procrastination L. Michelle Tullier,1999 Offers advice on how to deconstruct unproductive work habits improve time management and increase productivity at work and at home **Life Begins at Sixty** Joan Frentz,2004-08 *FIT ME - Professional System of Nutrition and Training* Florin Mihai,2020-05-01 What's in the complete FIT ME guide FIT ME is a unique combination of nutrition and exercise Follow the programmes separately but together they deliver the results you are looking for Training plan for 11 weeks A detailed plan for every day All you need 2 adjustable dumbbells Just 45-60 minutes a day for three days a week The most effective exercises and techniques Carefully controlled progression and intensity Develop all muscles evenly Burn fat quickly Develop strength mobility and muscle tone I want you to get it right Step by step instructions Click on the workout plan to see a demonstration video Learn the key points to pay attention to in executing each exercise Prevent injuries and exercise safely Understand the principles that lead to accelerated weight loss and the development of muscle mass Unattractive fat will disappear from all areas leaving a fit and shapely body Modern and professional nutritional plan Once you learn how to be really healthy you will also learn how to reach and maintain your optimal weight The FIT ME programme is all about healthy lifestyle Nutritional strategies related to a healthy lifestyle Clear explanations of which foods to eat when and why Creating a food plan tailored to your personal needs Principles that allow you to burn fat and grow muscle mass Nutritional tips and secrets from top experts in the fitness industry Valuable information and secrets for effective and healthy weight loss and a fit and attractive body Metabolic adjustment and maintenance of weight loss The crucial role of hormonal optimization Myths and illusions that have sabotaged your previous weight loss attempts Implementing modern motivational methods Remember the goal a fit and healthy body There's a story behind the FIT ME book It's hard for me to describe why one person's pain and struggle with obesity had such an impact on me All I know is that it did and that my own life took a different path as a result I was on my way home after a busy day standing in the corner store trying to remember what I was meant to buy for the kids As I called home to ask What did you say I had to buy I heard the beep of someone calling me I'll call you right back someone's calling me It was a call from an unknown number Even though I had had a busy day I still answered the phone Hello FM Personal Trainer how can I help you Hi I need help Please I could hear the sadness and despair in the voice This was someone who really needed help He says he has to lose weight and needs to see me immediately It's late and I try to schedule for another day but he insists and I can hear from his tone that he can't stand much delay So I agree and start driving to the indicated location He tells me that he'll wait in front of his house and I won't miss him because he's so large I call home again I'll be there later a new client has appeared and I hear the displeasure in my wife's voice When I reach the destination I can see he was right he is large He's also young probably less than 20 There are only two steps in front of the

house and he's struggling to climb them holding the door frame tightly to pull himself in. Let's call him Joe. Joe starts to tell me his story. He lists the multitude of diets he has tried and the failed attempts to exercise. I understand him. I was like this once. Finally, he tells me resignedly, "It's genetic, there's nothing I can do. I think I have to live with it." Before I can contradict him, his mother comes into the room carrying a stack of beautifully washed and ironed shirts which she puts carefully into a bag, saying, "I have prepared your work clothes for tomorrow." Then, with a gentle smile, she says to me, "He inherited it from me. I have morbid obesity. She gives me the list of problems that she has. She can't even stand for long and spends most of her time sitting in a wheelchair. I am curious about the shirts and ask what work Joe is doing. I pack vegetables but because I sweat a lot, I have to change every 2 hours, otherwise I get cold. I really can't afford to get sick and stay at home. I have two younger brothers who go to school and there's my mom who is sick. So I have to work. I use five T-shirts a day but it's okay. I'm used to it. I completely forget about the busy day and my fatigue. I start pouring out information that will help him lose weight. I want to help him. I begin to explain one after the other all the mistakes he has made: how he lost muscle mass through starvation, why he does not lose weight even if he eats very little, the role of hormones, why diets are not effective, the health benefits of losing weight. But then I realize this is way too much information all at once. All right, here's what we'll do. Tell me what you like to eat and I'll create a nutritional plan for you. From tomorrow, you will start to eat as we planned and gradually I will explain to you everything you need to know so that for the rest of your life you'll understand the principles of a fit and healthy body. I see the hope in his eyes and a determination to succeed even if he doesn't yet understand much about what he should do. He's confident again and I can feel his excitement. Suddenly, the sadness returns. The problem is that from next week we move to another city. The company I work for has seasonal vegetable warehouses and the vegetable season here will end this week. I really want to do this but it looks like I'm going to fail again before I start. How many weeks of counselling should I have with you and how much does it cost? I know a personal trainer is quite expensive and I don't know if I try to stop him. This is not about money. He insists and takes cash from his pocket to pay me but I really can't take the money. I literally can't. I feel like I need some fresh air. I say goodbye in a hurry. I get in the car and I actually feel overwhelmed by sadness, compassion, but also admiration for his determination to take on responsibilities for his family and to keep looking for a solution for his own health problems. He's got to make it, he's got to do it. I promise myself I'll do everything I can to help him and find a way to advise him even if he's far away. I get home and the kids are all over me wanting to know why I am late. I can't talk about it. So that's how it started. That night I worked to sort out his nutritional plan and to find a solution for the future. From the next day he started eating according to my nutritional plan. And I started writing every night, chapter after chapter, covering absolutely everything that he needed to know to get results. He left the city and at the end of every week I sent him a new chapter. I was working during the day, doing workouts and providing nutritional advice as usual but I couldn't wait to get home so I could write some more. After the first month he had lost a good few pounds and his self-confidence had

grown enormously He started posting pictures of himself His previous profile picture was of a wild horse After almost three months he had dropped multiple clothing sizes and was increasing the intensity of his exercises He sent me a message Guess what I have a girlfriend I knew how much it meant to him and I was so happy He d lost some weight his clothes fitted him but this is what was really important his self esteem and self confidence were growing and he was making a huge difference to his overall health Meanwhile his willpower and determination to stick to the nutritional plan and the training programme despite being so far from me his personal trainer inspired me to write my first book on nutrition and training I collected all the chapters I had written and linked and improved them even adding demonstration videos with workouts that could easily be done at home I wouldn t have thought of writing a book before but sometimes when you believe you are inspiring and helping someone else you actually get inspired and help yourself I sent Joe the first copy of my book and can only thank him for allowing me to meet him and help him Today I want to share with you everything I wrote over this time I know that if you are like Joe you can learn everything you need from my book and you can apply it wherever you are I d be so happy to add you to my list of distance clients who have had impressive results Florin Mihai Personal Trainer *The Role of Exercise in Anti-Aging* Dr. Goh Kong Chuan,2009-12-30 This is a book written by a Medical Doctor who specializes in the preventive aspect of Sports Medicine and is all about his experience in looking after patients keeping abreast with the latest advances and competing in various sports It discusses the popular modes of exercise so that the reader need not have to try them out himself and explores the newer medical concepts It is written from practical experience from treating patients observing those who age around us and from applying these very principles on the author himself The proof is in the pudding and many examples of the healthy elderly are shown *Ultimate You* Joe Dowdell,Brooke Kalanick,2010-05-11 When Hollywood s brightest stars need to shape up they turn to world renowned trainer Joe Dowdell for his innovative workouts Now he teams up with naturopathic doctor Brooke Kalanick to create this one of a kind plan that will help you achieve the body you ve always wanted Ultimate You is not a weight loss plan It is a fat loss plan with the revolutionary concept of metabolic disturbance at its core Metabolic disturbance revs up fatburning hormones during your workout and creates a post workout afterburn that torches calories for hours after you leave the gym Learn how to easily and naturally manipulate hormones that affect fat gain and fat loss with a diet that emphasizes real whole foods plus dozens of meal ideas and recipes With a 4 phase plan that maximizes weight loss you won t have to log excessive time in the gym You ll be exercising smarter Ultimate You is your health and fitness bible a powerful plan for exercising and eating that will result in an amazing body and optimum health *Senior Fitness* Ruth E. The Other Side of 50 Steve Ostrow,2009-12-07 This manuscript that you are reading is not a book in the traditional sense of the word It is rather a compilation of thoughts and experiences I have had and various treatises that I have felt compelled to write over the last few years It is because of my desire to share these observations that I have decided to put them together They all served to codify my thoughts and feelings and convey what I personally believe in areas of health of body mind and spirit Because some of these articles were written at different times you may find certain truths repeated from time to time Please forgive this and edit them out it is my feeling that they serve to reinforce that which has helped me to arrive happily at three score and ten I still refer back to this book as a resource and find its validity for me to be sustaining If it helps you to have at least one happier day it will have fulfilled its purpose
