International Transactions In Services Karl P Sauvart,2020-01-29 This book focuses on the international politics of transborder data flows It examines the rise of data services and the impact of these services on international economic transactions The book looks at trade and foreign direct investment in services and reviews the policy position of the U S

International Trade in Services and Domestic Regulations Panagiotis Delimatsis,2007-12-27 This book examines the regulation of services within the WTO It examines the problem of reconciling a liberal system of trade in services with national governments ability to protect social values through service regulation The book analyses the existing legal framework and assesses the potential of ongoing trade negotiations **The Regulation of International Trade, Volume**

3 Petros C. Mavroidis,2020-11-24 A comprehensive analysis of GATS that considers its historical context the national preferences that shaped it and a path to a GATS 2 0 The previous two volumes in *The Regulation of International Trade* analyzed the General Agreement on Tariffs and Trade GATT the first successful agreement to generate multilateral trade liberalization and the World Trade Organization WTO for which the GATT laid the groundwork In this third volume Petros Mavroidis turns to the General Agreement on Trade in Services GATS a WTO treaty that took effect in 1995 and offers a comprehensive analysis that considers the historical context of the GATS the national preferences that shaped it and a path to a GATS 2 0 Mavroidis examines the GATS through its negotiating record considering whether the GATS as it is can appropriately address the concerns of the world trading community The GATS deals exclusively with non tariff barriers NTBs precisely the instrument that the WTO has not managed to tame and one of some significance in light of the digital revolution which has enlarged the scope of cross border transactions in which neither supplier nor consumer needs to travel for a service to be consumed Mavroidis argues that the GATS has brought about a platform to liberalize services and has locked in some pre GATS liberalization What is missing he contends is a GATS Think that would generate liberalization from now on

The Limits of Transparency Jacqueline Best,2007 Jacqueline Best has developed a novel theoretical framework to more fully comprehend the role of ambiguity in international governance *Environmental Sovereignty and the WTO: Trade Sanctions and International Law* Bradley Condon,2006-04-19 The growing body of WTO jurisprudence is of profound significance for the development of the general body of international law With this in mind *Environmental Sovereignty and the WTO* succinctly examines how the WTO law can contribute to achieving coherence between general international law international environmental law and international trade law and avoid conflicts between trade liberalization and global environmental protection Professor Condon argues that these three branches of law are generally consistent with each other in the area of international law where they intersect However WTO jurisprudence can benefit from a more explicit analysis provided here of the way that panel decisions fit into the general framework of international law No law reforms are currently needed to facilitate this task As the text shows it is a matter of using the current WTO rules to resolve conflicts

between treaties such as the General Agreement on Tariffs and Trade GATT and multilateral environmental agreements MEAs and to determine the circumstances in which unilateral trade measures should be permitted The topics addressed in Environmental Sovereignty and the WTO will be of considerable interest to a broad audience given the global political controversy over American unilateralism the fairness of WTO rules to poor countries and the effect of trade rules on efforts to protect the global environment However the book addresses these controversial issues without sacrificing academic rigour and will appeal to a scholarly and professional audience seeking new approaches to addressing the problems raised by the globalization of law Published under the Transnational Publishers imprint

The Rise of Transparency in International Arbitration Alberto Malatesta ,Rinaldo Sali,2013-08-01 The Rise of Transparency in International Arbitration is inspired by a joint research conducted in the last years by the Milan Chamber of Arbitration and the Law School of the University Carlo Cattaneo LIUC Castellanza in Italy The two bodies have shared a common concern in order to increase the use of international commercial arbitration and to develop a proper culture in the field the need for enhancing transparency and especially for a wider dissemination of arbitral awards The advantages of arbitration as the main alternative means of dispute resolution are well known and undisputed Privacy and confidentiality are among them and at the same time among the prevailing features of any arbitral proceedings However sometimes users have the feeling to deal with a close and too slow growing world The need if not the request for a greater accountability of the arbitral world in the whole is more and more widespread In this context the aim of this book is on the one hand to spur discussion and to shed new light on the traditional idea of confidentiality in international commercial arbitration and in some other figures alike Although this idea is sometimes founded upon sound reasons that cannot be ignored or totally set aside it must be reconsidered by taking into account the rise of transparency On the other hand a specific proposal is made in order to step ahead from the current situation with particular reference to the issue of the publication of the awards In this respect the main outcome is the Guidelines for the Anonymous Publication of Arbitral Awards already adopted and experienced by the Milan Chamber They are addressed to institutions practitioners scholars with the goal to favor the circulation of the awards and of the related decisions

International Trade in Services Olivier Cattaneo,Michael Engman,Sebasti n S ez,Robert M. Stern,2010-06-24 The services sector is key to economic growth competitiveness and poverty alleviation Comprising more than two thirds of the world economy services are now commonly traded across borders helped by technological progress and the increased mobility of persons In recent years a number of developing countries have looked at trade in services as a means to both respond to domestic supply shortages and to diversify and boost exports Any country can tap into the trade potential of services but not every country can become a services hub across sectors The opening of the services sector potentially comes with large benefits but also fears and costs that should not be overlooked This book provides useful guidelines for the assessment of a country s trade potential and a roadmap for successful opening and export promotion in select services sectors It looks at both the effects of increased imports and exports and provides concrete examples of developing country approaches that have either succeeded or failed to maximize the benefits and minimize the risks of opening It focuses on sectors that have been rarely analyzed through the trade lens and or have a fast growing trade potential for developing

countries These sectors are accounting construction distribution engineering environmental health information technology and legal services This book is designed for non trade specialists to understand how trade can help improve access to key services in developing countries and for trade specialists to understand the specific characteristics of each individual sector It will be a useful tool for governments to design successful trade opening or promotion strategies and for the private sector and consumers to advocate sound domestic policy reforms accompanying an offensive trade agenda **Routledge**
