Somalia Economy Without State:

Somalia Peter D. Little, 2003 Amaury Talbot Prize Winner Shows that Somalia is an extreme case of an economy without a government

Getting Somalia Wrong? Mary Harper, 2012-02-09 Somalia is a failed state representing a threat to itself its neighbours and the wider world In recent years it has become notorious for the piracy off its coast and the rise of Islamic extremism opening it up as a new southern front in the war on terror At least that is how it is inevitably portrayed by politicians and in the media Mary Harper presents the first comprehensive account of the chaos into which the country has descended and the United States renewed involvement there In doing so Harper argues that viewing Somalia through the prism of al Qaeda risks further destabilizing the country and the entire Horn of Africa while also showing that though the country may be a failed state it is far from being a failed society In reality alternative forms of business justice education and local politics have survived and even flourished Provocative in its analysis Harper shows that until the international community starts to get it right the consequences will be devastating not just for Somalia but for the world

The Early Morning Phonecall Anna Lindley, 2010-08-30 As migration from poverty stricken and conflict affected countries continues to hit the headlines this book focuses on an important counter flow the money that people send home Despite considerable research on the impact of migration and remittances in countries of origin increasingly viewed as a source of development capital still little is known about refugees remittances to conflict affected countries because such funds are most often seen as a source of conflict finance This book explores the dynamics infrastructure and far reaching effects of remittances from the perspectives of people in the Somali regions and the diaspora

With conflict driving mass displacement Somali society has become progressively transnational its vigorous remittance economy reaching from the heart of the global North into wrecked cities refugee camps and remote rural areas By following the money the author opens a window on the everyday lives of people caught up in processes of conflict migration and development The book demonstrates how in the interstices of state disruption and globalisation and in the shadow of violence and political uncertainty life in the Somali regions goes on subject to complex transnational forms of social economic and political innovation and change

The Political Economy of Peacemaking Achim Wennmann,2010-12-14 This book focuses on the economic dimensions of peace processes and examines the opportunities and constraints for assisting negotiated exits out of conflict Various works have addressed the economic characteristics and consequences of armed conflicts over the past two decades including issues such as blood diamonds natural resource wars economically motivated armed violence self financing conflict or the complicity of companies and state elites in conflict economies However rather than treating these issues as obstacles for peace this book explores whether they can be opportunities for peacemaking by adopting a political economy perspective The book looks at income sharing from natural resources as an opportunity for forward looking peacemaking strategies and the implications of deal making in situations in which war economies and insecurity provide strongmen with disproportionate political and economic power The book also highlights that peace processes are not necessarily about the rectification of a conflict s root causes but rather about what matters most to the main stakeholders at the moment when a peace process starts taking shape Finally efforts to establish a lasting peace need to go beyond the traditional set of actors associated with peace processes The strategic involvement of donor agencies companies and diaspora communities can strengthen forward looking peace processes The book will help both student and practitioner audiences to better understand armed conflicts and their belligerents optimize the planning and management of peace initiatives and shape expectations in peace agreements It will be of much interest to students of peacebuilding conflict studies development studies International Political Economy and International Relations in general

Risk and Social Change in an African Rural

Economy John G. McPeak, Peter D. Little, Cheryl R. Doss, 2011-07-21 Pastoralists role in contemporary Africa typically goes underappreciated and misunderstood by development agencies external observers and policymakers Yet arid and semi arid lands ASAL which are used predominantly for extensive livestock grazing comprise nearly half of the continent s land mass while a substantial proportion of national economies are based on pastoralist activities Pastoralists use these drylands to generate income for themselves through the use of livestock and for the coffers of national trade and revenue agencies They are frequently among the continent s most contested and lawless regions providing sanctuary to armed rebel groups and exposing residents to widespread insecurity and destructive violence The continent s millions of pastoralists thus inhabit some of Africa s harshest and most remote but also most ecologically economically and politically important regions This study summarizes the findings of a multi year interdisciplinary research project in pastoral areas of Kenya and Ethiopia The cultures and ecology of these areas are described with a particular focus on the myriad risks that confront people living in these drylands and how these risks are often triggered by highly variable rainfall conditions The authors examine the markets used by residents of these areas to sell livestock and livestock products and purchase consumer goods before turning to an analysis of evolving livelihood strategies Furthermore they focus on how well being is conditioned upon access to livestock and access to the cash economy gender patterns within households and the history of development activities in the area The book concludes with a report on how these activities are assessed by people in the area and what activities they prioritize for the future Policy in pastoral areas is often formulated on the basis of assumptions and stereotypes without adequate empirical foundations This book provides evidence on livelihood strategies being followed in pastoral areas and investigates patterns in decision making and well being It indicates the importance of livestock to the livelihoods of people in these areas and identifies the critical and widespread importance of access to the cash economy concluding that future development activities need to be built on the foundation of the livestock economy instead of seeking to replace it

fragility on citizens and neighbouring states the book discusses capacity building approaches This part shows how effective states can be built on the African continent a process that would result in a change from state fragility to state resilience It is based on lessons learnt from close studies of the nations where the state has been most developed in the region in Eastern and Southern Africa The book provides and responds to the most recent and up to date information on African development and uses insights of people who have lived and worked in the continent for most of their lives *Livelihoods, Natural Resources, and Post-Conflict Peacebuilding* Helen Young, Lisa Goldman, 2015-04-10 Sustaining and strengthening local livelihoods is one of the most fundamental challenges faced by post conflict countries By degrading the natural resources that are essential to livelihoods and by significantly hindering access to those resources conflict can wreak havoc on the ability of war torn populations to survive and recover This book explores how natural resource management initiatives in more than twenty countries and territories have supported livelihoods and facilitated post conflict peacebuilding Case studies and analyses identify lessons and opportunities for the more effective design of interventions to support the livelihoods that depend on natural resources from land to agriculture forestry fisheries and protected areas The book also explores larger questions about how to structure livelihoods assistance as part of a coherent integrated approach to post conflict redevelopment Livelihoods and Natural Resources in Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six books of case studies and analyses with contributions from practitioners policy makers and researchers Other books in this series address high value resources land water assessing and restoring natural resources and governance
