The result is a text that is authoritative and complete easy to read without being reductive Modern Architecture Frank Lloyd Wright, 2021-07-13 Frank Lloyd Wright's classic account of his vision for an organic

architecture in a beautifully designed new edition Modern Architecture is a landmark text the first book in which America's

greatest architect put forth the principles of a fundamentally new organic architecture that would reject the trappings of historical styles while avoiding the geometric abstraction of the machine aesthetic advocated by contemporary European modernists One of the most important documents in the development of modern architecture and the career of Frank Lloyd Wright Modern Architecture is a provocative and profound polemic against America's architectural eclecticism commercial skyscrapers and misquided urban planning The book is also a work of savvy self promotion in which Wright not only advanced his own concept of an organic architecture but also framed it as having anticipated by decades and bettered what he saw as the reductive modernism of his European counterparts Based on the 1931 original for which Wright supplied the cover illustration this beautiful edition includes a new introduction that puts Modern Architecture in its broader architectural historical and intellectual context for the first time The subjects of these lively lectures from Machinery Materials and Men to The Tyranny of the Skyscraper and The City move from a general statement of the conditions of modern culture to particular applications in the fields of architecture and urbanism at ever broadening scales Wright's vision in Modern Architecture is ultimately to equate the truly modern with romanticism imagination beauty and nature all of which he connects with an underlying sense of American democratic freedom and individualism List of Books Forming the Reference Library in the Reading Room of the British Museum British Museum. Martin van der Linden,2021-03-12 The question of what architecture is answered in this book with one sentence Architecture
is space created for human activities The basic need to find food and water places these activities within a larger spatial field
Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth
Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the
context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual
interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly
stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against
the context and that this process is deterministic
