Aristotle until the late nineteenth century many people believed in spontaneous generation that living creatures sprang into existence from rotting material As Daryn Lehoux explains in this fascinating book spontaneous generation was perhaps the last stand of the ancient scientific worldview In *Creatures Born of Mud and Slime* Lehoux shows that far from being a superstitious gullible or simplistic belief spontaneous generation was a sophisticated and painstakingly grounded fact that stood up to the best scientific testing Starting with the ancient Greeks careful and detailed investigations into how animals are generated straight through to the early modern period Lehoux brings to life the intellectual contexts rivalries observational evidence and complex and fascinating theories that were used to understand and explain the phenomena The book highlights both the weirdness and the wonder that lie at the heart of investigations into nature Lehoux concludes with a new look at a set of conflicting experiments that demonstrate that even the best scientific evidence can end up muddying what we take to be the truth about the world *Creatures Born of Mud and Slime* is a compelling look at how we understand conceptions of scientific change truth and progress A very well written and well researched book that grapples with the foundational questions of the history of Western philosophy Justin E H Smith author of *The Philosopher A History in Six Types* A historical tour de force the author's brilliant prose makes the reader appreciate at one time the strangeness and the persuasive power of outmoded scientific explanations Paolo Savoia *Nuncius* 34 Concise and accessible Lehoux's clarity and graceful prose make this book a pleasure to delve into James Strick *HOPOS* 8

**Fishing for Praise** Paul Poulton, 2008-01-01 Praise is a hidden doorway in the world that enables us to see things outside of the universe But it's a doorway that is easily missed people walk past it thinking nothing of it not realizing the value of it But God has placed it there for us to walk through and see where he lives This look at praise takes some surprising turns and gives us insight into heaven hell the world we live in and our own souls People praise all sorts of things I find myself praising my wife or praising children footballers or chefs I even praise my dog When we praise God it is a natural extension of what we normally do every day And praise isn't one way because God praises us too When we are patient praise will come our way from the most unexpected source and it will come just when our enemies have turned up to see it God intervenes on our behalf when we leave the task of being praised to him Contrary to

popular belief praise comes to those who wait We don't have to fish for it 1785-1790 Royal Society (Great Britain), Charles Hutton, Richard Pearson, 1809 **United States Investor**, 1913 **Scribner's Magazine**, 1902
