Somewhere More Holy Tony Woodlief, 2010-04-28 Acclaimed columnist Tony Woodlief pens the poignant and powerful story of his search for meaning in the midst of tragedy When he and his wife lost their adored little girl his trust in God turned to bitter anger As he and his wife struggled to save their marriage and his faith they discovered that home is more than just rooms and a roof Home is a place where people are sometimes wounded or betrayed Home is also where God is strong in the broken places Woodlief takes readers through his house room by room showing that home is Where we cry out to God as we seek him in the small things Where the sacred and the mundane meet The place that makes us better than we could ever be on our own More than the place where we eat and sleep it is where we learn grace Woodlief's heart touching stories leavened with humor will appeal to a wide audience especially those trying to reconcile the idea of a loving God in a broken world

Current Research on Sleep and Dreams Gay Gaer Luce, 1965 **Current Research on Sleep and Dreams** United States. Public Health Service, Gay Gaer Luce, 1966 This monograph was stimulated by the extraordinary growth now apparent in an area generally identified as sleep and dream research for this recent concentration of scientific effort offers a singular example of the power that basic research can exert in penetrating the problems of mental health and illness In the past year alone the National Institute of Mental Health supported over 60 projects related in whole or in part to studies of sleep and dreams with awards totaling over 2 million The work of many of these NIMH investigators is included in this summary which extends beyond the Institute's program insofar as necessary to indicate the major trends of work in the area The report cannot of course encompass the classical studies already summarized in published literature nor even provide comprehensive survey of present day sleep research for although much of the scientific data on sleep have been generated during the last dozen years significant references in this field now number in the many thousands The mosaic of

disciplines contributing to the study of sleep contains such diverse fields as psychiatry and mathematics psychology and biochemistry physiology and anthropology Nevertheless ferment about the subject matter and a spirit of cooperation across traditional disciplinary lines have made it possible to knit together data that might otherwise have lain unrelated in a variety of laboratories During the past year individual summaries of many of the projects cited here were distributed to scientists working in the field of sleep and dreams Many of the recipients felt that up to date reports especially in a field of such dynamic activity represented a unique solution to the problem of scientific information exchange Such communication it was felt provided a quick look at work in progress that might prevent duplication of effort and stimulate pertinent contacts among scientists thus aiding them in their work It is hoped that this monograph will be a further part of that process Foreword
