Sommes Nous Sortis Du Capitalisme Industriel:

Major French Cities facing Metropolization Alain Bourdin, 2024-05-27 This book characterizes a type of city i.e. the metropolis by using characteristics which have very little to do with its size. It distinguishes between metropolises and megacities and defines these different characteristics by bringing together elements related to facilities accessibility and economic power on one hand and other elements which relate more to the capacity for innovation and more generally to the knowledge society and economy. All of which demonstrate the process of metropolization as well as elements of daily life and more generally elements which relate to the urban experience. To live in a metropolis is not only to benefit from more urban amenities but also to live in a different way in particular in a world which is much more diverse in every respect. Based on a series of metropolization criteria constructed and discussed, this book goes beyond ordinary statistical approaches to integrate the interterritorial scale of metropolitan systems as well as their qualitative dimension. Following in Simmel's footsteps, it shows that a city is also an atmosphere, a mentality, a spirit, all of which are poorly captured by statistical data. As such, the book focuses on five major themes: networks, economic development, social issues, urban form, and the ecological and digital transition. The book makes an interesting read for urban planners, sociologists, planners, and architects and all specialists working in this field.

Cognitive Capitalism, Welfare and Labour Andrea Fumagalli, Alfonso Giuliani, Stefano Lucarelli, Carlo Vercellone, 2019-05-29 This book deals with the transformations of both accumulation process and labour in the transition from a Fordist to a cognitive capitalism paradigm with specific regard to Western economies. It outlines the advent after industrial capitalism of a new phase of the capitalist system in which the value of cognitive labour becomes dominant. In this framework, the central stakes of capital valorisation and forms of property are directly based on the control and privatization of the production of collective knowledge. Here, the transformation of knowledge itself into a commodity or a fictitious capital is analyzed. Building on this foundation, the authors outline their concept of commonfare. This idea of commonfare implies as a prerequisite the social re-appropriation of the gains arising from the exploitation of those social relations which are the basis of accumulation today. This re-appropriation does not necessarily lead to the transition from private to public ownership but it does make it necessary to distinguish between common goods and the commonwealth. This book explains this distinction and how common goods and the commonwealth require a different framework of analysis. This volume will be of great interest to all scholars and researchers as well as a more general readership who wish to develop a critical thinking of the mainstream analysis of this topic. Contributing to the Marxism heterodox approach using rigorous theoretical analysis and empirical evidence, it is aimed at all those who act socially and aspire to a better understanding of the development and the contradictions of contemporary capitalism.

Cognitive Capitalism and Its Reflections in South-Eastern Europe Vladimir Cvijanović, Carlo Vercellone, Andrea Fumagalli, 2010 Cognitive capitalism is considered to be a new stage in the historical evolution of capitalism which is undergoing a metamorphosis affecting most of the laws and

tendencies characteristic of industrial capitalism This raises a series of issues tackled in the theoretical part especially regarding the increased importance of cognitive work and the new composition of the labour market that influence the determinants of the value of goods the structure of welfare and the forms of income distribution A historical analysis is applied to describe the evolution of cognitive capitalism and its endogenous potentially destabilising dynamics The empirical part analyses the diffusion of cognitive capitalism in the former socialist countries of South Eastern Europe and elsewhere

Governing Knowledge Ivar Bleiklie, Mary Henkel, 2005-07-18 In this book an international group of leading higher education researchers draw on a wealth of social theory and comparative empirical research to analyse current developments and their implications Different contributions focus on different levels of higher education the system the institution and the academic practitioner in different national and international contexts However strong common themes bind these contributions together They include not only the significance of massification globalisation neo liberalism and managerialism for the governance of higher education its knowledge and values but also the complexities of change processes the importance of context and history and the strength of the stabilities that remain The inspiration for this work comes from the career and personal influence of an individual scholar Maurice Kogan A central feature of his work has been empirically grounded analysis of interconnections between knowledge values authority and power and how these are reflected in institutional structures and individual practices As a historian as well as a political scientist he has always insisted on locating contemporary developments in a longer term perspective This volume is for researchers in higher education studies students in postgraduate courses in higher education policy and management higher education policy makers in national and international organisations higher education institutional leaders senior academics managers and administrators Professor Teboho Moja New York University USA It will be an invaluable resource inter alia for higher education students scholars and institutional leadership The book could provide a major contribution to the field of higher education because of the different perspective different authors present and an array of issues as well as frameworks to discuss them This book is bound for the desktops instead of the bookshelves of administrators researchers and graduate students It is likely to be used time and again as readers explore new ways to transform education systems or institutions meet their needs for program improvement policy development and general research I expect that most readers will weave through the chapters on an as needed basis until they have engaged all its excellent content

Reconsidering Value and Labour in the Digital Age Christian Fuchs, Eran Fisher, 2015-10-21 This volume explores current interventions into the digital labour theory of value proposing theoretical and empirical work that contributes to our understanding of Marx s labour theory of value proposes how labour and value are transformed under conditions of virtuality and employ the theory in order to shed light on specific practices

The Rise and Fall of Neoliberal Rentier Capitalism Luiz Carlos Bresser-Pereira, 2025-02-10 The Rise and Fall of Neoliberal Rentier Capitalism is an account of the political economy of

capitalism in the 20th and 21st centuries Capitalism is an unjust form of economic organisation it is a culture of exacerbated individualism justified by the glorification of individual competition Today after 40 years of neoliberalism capitalism faces again a legitimization crisis The book discusses capitalism after two revolutions the Organisational Revolution and the Democratic Revolution It views capitalism since the New Deal in the US and the post war as a progressive and developmental era and the Neoliberal Turn as the change from social democracy to radical and regressive global neoliberalism which was a regressive time for almost forty years In the Neoliberal Years rentiers replaced entrepreneurs in the command of the economy and called on the financiers to manage their wealth and serve as organic intellectuals and both mounted an attack to the state which is the main capitalist institution The global crisis and in 2020 the Covid pandemic showed that the state remains the nations resource of last instance The transition of China from statism to an active developmentalism resulted in an extraordinary growth Given such realities in 2021 we saw the collapse of neoliberalism and in the United States a Developmental Turn the state is back in the economy The transition phase we live in is characterised by three main forces economic liberalism managerialism and democracy Economic liberalism is the great defeated managerialism became powerful and is developmental and democracy is the stronger force It was attacked by neoliberalism and is now being attacked by right wing populism but resisted and resists brilliantly proving that it was a conquest of the popular classes that became a universal value counting on the support of all social classes *Italian Thought Today* Lorenzo Chiesa,2015-09-25 This collection provides English readers with a critical update on current debates on biopolitics in and around Italian thought More than a decade after the publication of seminal books such as Agamben's *Homo Sacer* and Hardt and Negri's *Empire* the names of among others Roberto Esposito Paolo Virno Christian Marazzi and Andrea Fumagalli have recently been brought to the attention of Anglophone scholars and political activists Several authors have rightly emphasised the evanescent character of biopolitics and the difficulty in providing a definition of it that could embrace all the conflicting theories of its most celebrated critics and supporters The present collection is structured around the basic contention that bio economy human nature and Christianity are the three visible contemporary manifestations of the theoretical object problem of biopolitics in respectively Italian post workerist economics post Marxist philosophical anthropology and post structuralist ontology This book was originally published as a special issue of *Angelaki* **Innovation in Clusters** Estelle Vallier,2021-11-30 Forged at the heart of international political bodies by expert researchers the innovation cluster concept has been incorporated into most public policies in industrialized countries Based largely on the ideas behind the success of Silicon Valley several imitative attempts have been made to geographically group laboratories companies and training in particular fields in order to generate synergies between science and industry In its first part *Innovation in Clusters* analyzes the infatuation with the system of clusters that is integral to innovative policies by analyzing its socio historical context its revival in management and its worldwide expansion looking at a French example at a local level In its second part the book explores a specialized

biotechnology cluster dating back to the end of the 1990s The sociological survey conducted twenty years later sheds a different light on the dynamics and relationships between laboratories and companies contradicting the commonly held belief that innovation is made possible by geographical proximity

Media Matters in the Cultural Contradictions of the "information Society" Divina Frau-Meigs, 2011-01-01 Is an online identity protected by freedom of expression or is it a form of publicity subject to trademark law Is online privacy a commercial service or a public right What are the limits of consent when dealing with privacy as a service What are free open or public services on the Internet and how can citizens use them effectively What policy initiatives can ensure that the digital networks deliver the goods spectacles and services for our everyday activities that improve our quality of life What role for governments the private sector and civil society What frameworks for international policy instruments to achieve a fair inclusive and balanced governance of the media as they go digital This work addresses these burning issues and many more that preoccupy decision makers researchers and activists at all levels of society It covers the issues of dignity ethics identity privacy cultural diversity public service gate keeping and education in an encompassing human rights based governance framework Considering the perils and promises of each issue the authors make constructive recommendations insisting on the relation between local and global governance the public value of media digital networks and the benefits of multi stakeholder partnerships

Mythocracy Yves Citton, 2025-04-01 Harnessing the power of storytelling for political progress Mythocracy examines the narrative mechanisms that script our lives through the stories we tell one another Digging beneath common anxieties about fake news Yves Citton looks at the attention economy which organises our political perceptions around affective attractors These are much more powerful than the truth value of any given narrative The time has come for the left to reclaim the power of myth from reactionary populism

Universal Basic Income in Historical Perspective Peter Sloman, Daniel Zamora Vargas, Pedro Ramos Pinto, 2021-11-19 This new edited collection brings together historians and social scientists to engage with the global history of Universal Basic Income UBI and offer historically rich perspectives on contemporary debates about the future of work In particular the book goes beyond a genealogy of a seemingly utopian idea to explore how the meaning and reception of basic income proposals has changed over time The study of UBI provides a prism through which we can understand how different intellectual traditions political agents and policy problems have opened up space for new thinking about work and welfare at critical moments Contributions range broadly across time and space from Milton Friedman and the debate over guaranteed income in the post war United States to the emergence of the European basic income movement in the 1980s and the politics of cash transfers in contemporary South Africa Taken together these chapters address comparative questions why do proposals for a guaranteed minimum income emerge at some times and recede into the background in others What kinds of problems is basic income designed to solve and how have policy proposals been shaped by changing attitudes to gender roles and the boundaries of social citizenship What role have transnational networks played in carrying UBI proposals between the

global north and the global south and how does the politics of basic income vary between these contexts In short the book builds on a growing body of scholarship on UBI and lays the groundwork for a much richer understanding of the history of this radical proposal Chapter 3 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

The Uncertain Digital Revolution André Vitalis, 2016-09-16 Digital information and communication technologies can be seen as a threat to privacy a step forward for freedom of expression and communication a tool in the fight against terrorism or the source of a new economic wealth Computerization has unexpectedly progressed beyond our imagination from a tool of management and control into one of widespread communication and expression This book revisits the major questions that have emerged with the progress of computerization over nearly half a century by describing the context in which these issues were formulated By taking a social and digital approach the author explores controversial issues surrounding the development of this digital revolution including freedom and privacy of the individual social control surveillance public security and the economic exploitation of personal data From students teachers and researchers engaged in data analysis to institutional decision makers and actors in policy or business all members of today's digital society will take from this book a better understanding of the essential issues of the current digital revolution

The Hardship of Nations Benjamin Coriat, Pascal Petit, Geneviève Schméder, 2006-01-01 After more than two decades of widespread hardship for most nations what are the different paths available for them to resume steady growth and welfare Will they actually succeed in building new growth models that meet the challenges of the present phase of internationalisation This book attempts to answer these questions by analysing different perspectives and discussing the conditions for new national growth trajectories to emerge

The Affective Turn Patricia Ticineto Clough, Jean Halley, 2007-07-12 Linking cultural studies and sociology this collection explores the role of affect in the theorization of the social

Cognitive Capitalism Yann Moulier-Boutang, 2011 This book argues that we are undergoing a transition from industrial capitalism to a new form of capitalism what the author calls cognitive capitalism

Republican Citizens, Precarious Subjects Jeremy F. Lane, 2020 Over recent decades concerns at the increased scarcity and precarity of salaried employment have dominated political struggles theoretical debates and cultural representations in France This study argues that such concerns are evidence of a profound shift in contemporary French economy culture and society Engaging with work in political economy and sociology the book sketches a new interpretative framework the better to understand the nature and implications of these profound changes It examines the challenges such changes have posed to fundamental French republican values arguing they have opened up a rift between older notions of French republican citizenship and the precarious forms of subjectivity characteristic of post-Fordist labour The book traces the symptoms of this rift in a range of cinematic and literary representations of the contemporary workplace as these depict the dilemmas faced the trajectories followed and the geographical regions inhabited by French workers of different ages sexes social classes and ethnicities

What Is Government Good At? Donald J.

Savoie,2015-08-01 Recent decades have shown the public's support for government plummet alongside political leaders' credibility. This downward spiral calls for an exploration of what has gone wrong. The questions 'What is government good at' and 'What is government not good at' are critical ones and their answers should be the basis for good public policy and public administration. In 'What Is Government Good At' Donald Savoie argues that politicians and public servants are good at generating and avoiding blame, playing to a segment of the population to win the next election, embracing and defending the status quo, adding management layers and staff, keeping ministers out of trouble, responding to demands from the prime minister and his office, and managing a complex prime minister centred organization. Conversely, they are not as good at defining the broader public interest, providing and recognizing evidence based policy advice, managing human and financial resources with efficiency and frugality, innovating and reforming itself, being accountable to Parliament and to citizens, dealing with non performers, paying sufficient attention to service delivery and implementing and evaluating the impact of policies and programs. With wide implications for representative democracy, 'What Is Government Good At' is a persuasive analysis of an approach to government that has opened the door to those with the resources to influence policy and decision making while leaving average citizens on the outside looking in.

Credit, Money and Macroeconomic Policy Claude Gnos, Louis-Philippe Rochon, 2011-01-01 While some of the chapters address the recent crisis as well as adjustments to the Basel Accord, others analyze the required changes to the conduct of monetary and fiscal policies. The distinguished authors offer an in depth and comprehensive analysis of macroeconomics and provide alternative policies to deal with a number of persistent modern day problems.

Re-framing Regional Development Philip Cooke, 2013-01-17 Turbulence characterises the current global scene. This book uses complementary theoretical approaches to understand and help prescribe policies to re frame the regional development problem in turbulent times. These approaches are evolutionary complexity, evolutionary economic geography, emergence theory and resilience theory. From below they address the four major crises creating a perfect storm for societies and economics involving the climate change crisis, the energy crisis, the banking and financial crisis and the global economic crisis. This book analyses and proposes ways in which regional economies in particular are having to be reframed to address these crises. First, many must evolve in new ways, possibly moving back from the service economy towards a new greener form of manufacturing of goods as well as services. Accordingly, regional economies are innovating in new ways. Amongst these are the quest for relatedness within their own regional orbits and promoting modularity as a mode of analysis and a policy stance to stimulate innovation across industry and geographical borders. Finally, regional economies and societies are discovering that from a resilience perspective they must find answers to the higher levels of governance with which they increasingly struggle. In this respect, regional economies are in transition and regional processes are emergent. The transition seeks to address the four crises involving re balancing, re directing and re framing future policy and practice. This book describes many of the novel framings involved in

understanding the new ways in which this major task is being addressed in theory policy and everyday practice
