*Apollo Program* Roger D. Launius, J. D. Hunley, 2021-04-11 In An Annotated Bibliography of the Apollo Program editors Roger D Launius and J D Hunley curate a compelling collection of works that explore the multifaceted legacy of NASA's Apollo missions This anthology stands as a monumental tribute to human ingenuity and cosmic ambition charting the Apollo program's historical trajectory through a diverse array of textual analyses The editors have meticulously selected materials ranging from technical reports and governmental documents to memoirs and reflections offering a panoramic view that captures both the scientific breakthroughs and the cultural resonances of this pivotal era in space exploration The contributors comprising esteemed historians engineers and cultural critics bring forth a rich tapestry of perspectives These voices collectively delve into the era's technological challenges geopolitical implications and the profound societal changes driven by the space race Aligning with the historical narrative of the late 20th century an epoch marked by scientific triumphs and ideational innovations the anthology serves as a scholarly junction where various interpretations of the Apollo program converge enriching the ongoing dialogue surrounding space exploration heritage For readers seeking a comprehensive understanding of the Apollo program this volume is an essential resource It not only provides insight into the technological marvels of the era but also encapsulates the philosophical and cultural dialogues that emerged alongside them The anthology's breadth affords a rare chance to engage with a multiplicity of viewpoints making it an invaluable tool for educators students and space enthusiasts alike intent on exploring the deeper narratives forged during humanity's bold ventures beyond our terrestrial confines

*Spanish humanism on the verge of the picaresque* Juan Maldonado, Warren S. Smith, Clark Colahan, 2009 The 16th century humanist Juan Maldonado in his Latin essays foreshadows the Spanish picaresque Like Erasmus with whom he corresponded Maldonado advocated the use of Latin in a wide range of activities Maldonado's Pastor Bonus a lengthy open letter to a bishop reviews in a vivid and satirical style the abuses of the churchmen in his diocese His ludus chartarum is framed as a colloquium similar to Vives on the subject entertaining while teaching a Latin terminology for card playing His Bacchanalia written for student actors is a spirited play pitting the forces of Lent against those of Bacchus as in the Libro de buen amor These works have been edited and translated into English by Warren Smith and Clark Colahan for the first time with illustrations of scenes from each work and of 16th century cards by Richard Simmons and Caleb Smith Publisher's website

[Drunk Flies and Stoned Dolphins](#) One R. Pagan, 2021-11-16 From the cup of coffee that jumpstarts the day to dangerously addictive drugs the recreational use of plants with psychoactive properties has a long history among humans But as with many things it turns out that other animals got there first From parrots to primates consuming medicinal chemicals is an instinctive behavior that helps countless organisms fight infection and treat disease But the similarities don't end there Like us many creatures also consume substances that have no apparent benefit except for inducing intoxication In fact animals have been using drugs for recreational purposes since prehistoric times We may even have animals to thank for the idea legend says that coffee was discovered by observing the behavior of goats that

had eaten it In his previous book *Strange Survivors* author and biologist On R Pag n introduced readers to some of the truly bizarre strategies animals use to survive in the cutthroat world of natural selection Now in *Drunk Flies and Stoned Dolphins* he sheds light on the surprising cravings they indulge when it s time to unwind In this book you ll get an eye opening glimpse into the mind altering behavior of the non human members of the animal kingdom spanning insects to elephants including the dolphin species that apparently likes to pass around an intoxicating pufferfish as if they were sharing a joint Combining fascinating science with humor and enthusiasm Pag n s latest is full of the kind of unforgettable stories and odd facts that you ll find yourself repeating to everyone you meet From fruit fly happy hour to the evolutionary reasons behind nature s drugs *Drunk Flies and Stoned Dolphins* takes you on a trip through the colorful world of animal intoxication and along the way explores what this science reveals about the surprising connections between all the world s creatures [Unbelievable](#)

Michael Newton Keas,2019-01-08 *Unbelievable* explodes seven of the most popular and pernicious myths about science and religion Michael Newton Keas a historian of science lays out the facts to show how far the conventional wisdom departs from reality He also shows how these myths have proliferated over the past four centuries and exert so much influence today infiltrating science textbooks and popular culture The seven myths Keas shows amount to little more than religion bashing especially Christianity bashing *Unbelievable* reveals Why the Dark Ages never happened Why we didn t need Christopher Columbus to prove the earth was round Why Copernicus would be shocked to learn that he supposedly demoted humans from the center of the universe What everyone gets wrong about Galileo s clash with the Church and why it matters today Why the vastness of the universe does not deal a blow to religious belief in human significance How the popular account of Giordano Bruno as a martyr for science ignores the fact that he was executed for theological reasons not scientific ones How a new myth is being positioned to replace religion a futuristic myth that sounds scientific but isn t In debunking these myths Keas shows that the real history is much more interesting than the common narrative of religion at war with science This accessible and entertaining book offers an invaluable resource to students scholars teachers homeschoolers and religious believers tired of being portrayed as anti intellectual and anti science [Congressional Record](#) United States.

Congress,1969 The *Congressional Record* is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The *Congressional Record* began publication in 1873 Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States* 1789 1824 the *Register of Debates in Congress* 1824 1837 and the *Congressional Globe* 1833 1873 [Experimental Histories](#) Hannah

Weaver,2024-08-15 In *Experimental Histories* Hannah Weaver examines the medieval practice of interpolation inserting material from one text into another which is often categorized as being a problematic inauthentic phenomenon akin to forgery and pseudepigraphy Instead Weaver promotes interpolation as the signature form of medieval British historiography and a vehicle of historical theory arguing that some of the most novel concepts of time in medieval historiography can be

found in these altered narratives of the past For Weaver historiographical interpolation constitutes the traces of active experimentation with how best to write history particularly the history of Britain Historians in twelfth and thirteenth century Britain recognized the difficulty of enfolding complex events into a linear chronology and embraced innovative textual methods of creating history Focusing on the Brut tradition but also analyzing the long history of interpolated historiography including the Bayeux Embroidery Experimental Histories offers a new interpretation of generic remixing in medieval writing about the past Drawing on both manuscript studies and the new formalism it shows that the practice of inserting materials from romance and hagiography allowed creative revisers to explore how lived events relate to passing time By embracing interpolation Weaver provides lively insights into the ways that time becomes history and human actors experience time

their impact on literature art and other media in the 18th and the 19th centuries Up until the 1830s science and culture were part of a joint endeavour to discover and explore the secret of life The question What is life unites science and the arts during the Ages of Enlightenment and Romanticism and at the end of the Romantic period a shift of focus from the human as an organic whole to the specialized disciplines signals the dawning of modernity The emphasis of the edited collection is threefold the first part sheds light on the human in art and science in the Age of Enlightenment the second part is concerned with the transitions taking place at the turn of the 19th century The chapters forming the third part investigate the impact of different media on the concept of the human in science literature and film

Reading the Mind of God A.E.L. Davis,J. V. Field,T. J. Mahoney,2024-11-19 This volume provides a wide ranging introduction to Kepler s work with essays on his religion his cosmological theories his work in astronomy astrology optics and mathematics and his interactions with Tycho Brahe and Galileo Galilei Kepler is a major figure in the history of science His laws of planetary motion overthrew a tradition going back as far as the ancient Greeks of constructing the paths of planets by combinations of circles and the derivation of the laws was revolutionary in the way it relied upon detailed agreement with observations Moreover the laws explicitly relate the motion and path of each planet to the Sun Thus when the tables that Kepler based upon the laws proved to be highly reliable over many decades this played a crucial part in making heliocentrism acceptable And many years after Kepler s death the laws themselves played an important part in Newton s derivation of the inverse square law of gravitation in his Principia 1687 In this respect Kepler can look modern But his work is grounded in his religious belief that the Universe is the visible expression of the nature of the God who created it This book whose chapters are written by leading scholars is primarily addressed to undergraduate and graduate students of science and the history of science but will also appeal to the general reader with an interest in the history of science
