**The Iron Age in**

**Northern Britain** Dennis W. Harding, 2017-02-24 The Iron Age in Northern Britain examines the archaeological evidence for earlier Iron Age communities from the southern Pennines to the Northern and Western Isles and the impact of Roman expansion on local populations through to the emergence of historically recorded communities in the post Roman period The text has been comprehensively revised and expanded to include new discoveries and to take account of advanced techniques with many new and updated illustrations The volume presents a comprehensive picture of the long Iron Age allowing readers to appreciate how perceptions of Iron Age societies have changed significantly in recent years New material in this second edition also addresses the key issues of social reconstruction gender and identity as well as assessing the impact of developer funded archaeology on the discipline Drawing on recent excavation and research and interpreting evidence from key studies across Scotland and northern England The Iron Age in Northern Britain continues to be an accessible and authoritative study of later prehistory in the region

**Beacons in the Landscape** Ian Brown, 2009-07-20 Of all Britain's great archaeological monuments the Iron Age hillforts have arguably had the most profound impact on the landscape if only because there are so many yet we know very little about them Were they recognised as being something special by those who created them or is the hillfort purely an archaeologists construct How were they constructed who lived in them and to what uses were they put This book which is richly illustrated with photography of sites throughout England and Wales addresses these and many other questions After discussing the difficult issue of definition and the great excavations on which our knowledge is based Ian Brown investigates in turn hillforts origins their architecture and the role they played in Iron Age society He also discusses the latest theories about their location social significance and chronology The book provides a valuable synthesis of the rich vein of research carried out in Britain on hillforts over the last thirty years Hillforts great variability poses many problems and this book should help guide both the specialist and non specialist alike though the complex literature Furthermore it has an important conservation objective Land use in the modern era has not been kind to these monuments with a significant number either disfigured or lost Public consciousness of their importance needs raising if their management is to be improved and their future assured

**The Archaeology of Lancashire** Richard Newman, 1996 A comprehensive review of Lancashire's archaeology which brings together all the evidence for this region for the first time some of it previously unpublished Each paper discusses a specific period from the upper palaeolithic and Mesolithic until the industrial revolution Under these broad headings the evidence is usefully summarised and topics discussed include past and present research the evolution of the landscape and future directions for research Contributors include David Shotter Robert Middleton Colin Haselgrove Jason Wood and Richard Newman

politics industry administration and the living standards of ordinary inhabitants      *A Guide to the Roman Remains in Britain* Roger John Anthony Wilson, 2002 Aimed at the non specialist reader this guide provides comprehensive coverage of the visible remains of Roman Britain More than 250 sites are described including 12 new to this revised edition each of which is accompanied by site plans and access details They range from the settlement of Chysauster at Land s End to Normandykes camp in the north of Scotland      **The Neolithic and Bronze Age Settlement at Oversley Farm, Styal, Cheshire** D. J. Garner, C. S. M. Allen, Francis F. Wenban-Smith, Richard E. Bevins, 2007 The detailed report of excavations undertaken at Oversley Farm on the edge of Styal in Macclesfield Cheshire England in advance of the construction of Manchester Airport s second runway in 1997 8      *Furness Abbey* Christine Dade-Robertson, 2000 This beautifully illustrated celebration of Furness Abbey second only to Fountains Abbey in wealth argues that the impact of the Abbey on the landscape and in the mind of the visitor is as strong today and that the Dissolution did not end the Abbey s history The ruin of Furness Abbey is used as a case study to explore the influence of ecclesiastical ruins on romantic painters and writers on antiquarians and archaeologists and the problem of when and how a ruin should be conserved Illustrated throughout with reproductions of engravings photographs and colour plans      **"Stone was the One Crop that Never Failed"** Christopher Casswell, Patrick Daniel, Carol Allen, 2010 In 2006 and 2007 a 94km long gas pipeline was excavated across the Pennines from Pannal in North Yorkshire to Nether Kellet in Lancashire N W England Around twenty archaeological excavations were undertaken to mitigate the impact of the construction of the pipeline on the archaeology of the route and these form the subject of this volume The excavated remains were generally slight and were widely scattered along the route the range of periods they represent is equally broad and intermittent The earliest recorded evidence was a Mesolithic flint scatter from Ribblesdale Bronze Age activity was represented by ringworks burnt mounds and rock art with an apparent concentration on the Craven lowlands during this period The prehistoric remains seem to reveal a low and shifting population more concerned with monumentality and remembering than with settlement and land division Very few traces of activity attributable to the 1st millennium BC were encountered Romano British remains were surprisingly sparse considering the military infrastructure and transport network inserted into the region at this time The pattern of slight and transient landuse with low levels of material culture established in prehistory appears to have been an enduring characteristic of the area The excavations along the Pannal to Nether Kellet pipeline have undoubtedly helped to characterise the archaeological resource of the Pennine river valleys through which it passed and have refined the understanding of the distribution and chronology of various activities and site types across a range of time periods Some questions have been answered and many new ones framed These sites now exist as a comparator for future work both in the local area and nationally      *The British National Bibliography* Arthur James Wells, 1998      *A Frontier Landscape* N. J. Higham, 2004 North west England has largely been neglected in studies of medieval landscapes in favour of the Midlands and East Anglia although it has much to offer

Described here as a frontier landscape encompassing the modern regions of Lancashire Cheshire Merseyside and Greater Manchester the author discusses changes to the medieval landscape and why these occurred He outlines and characterises the major period of expansion and economic boom that took place in the north west from 1086 to 1349 and asks why political and military matters seen to have had such an important role in landscape change Issues of perceived marginality are also discussed as Higham looks in turn at the local population and their environment land use and agrarian practices woodland forest and pasture buildings farms and estates markets and fairs and the Church and the landscape A great addition to the series
