**The Argument from Design** Thomas H. McPherson, 1972-06-18      The Argument from Design Thomas McPherson, 1972      *The Argument from Design* Vernon Faithfull Storr, 1920      **Adaptation** Michael R. Rose, George V. Lauder, 1996-09-22 The study of evolutionary adaptation returns to the center stage of biology with this important volume This innovative treatise discusses new developments in adaptation with new methods and new theoretical foundations achievements and prospects for a rich intellectual future It is an insightful reintroduction to the themes that Darwin and his successors regarded as central to any profound understanding of biology      *Charles Hartshorne and the Existence of God* Donald Wayne Viney, 1985-06-30 In a lucid and comprehensive study Professor Viney presents an excellent critical analysis of Hartshorne's thought about God Demonstrating his thesis from many points of view ontological cosmological teleological moral aesthetic etc Viney deftly illustrates Hartshorne's belief that any one argument for God is inconclusive but that many woven together make up a convincing interpretative expression of the world      **Is the New Theology Christian** Hakluyt Egerton, 1907      *The Argument from Design*, 2003      God and Design Neil A. Manson, 2003-09-02 Recent discoveries in physics cosmology and biochemistry have captured the public imagination and made the Design Argument the theory that God created the world according to a specific plan the object of renewed scientific and philosophical interest This accessible but serious introduction to the design problem brings together new perspectives from prominent scientists and philosophers including Paul Davies Richard Swinburne Sir Martin Rees Michael Behe Elliot Sober and Peter van Inwagen It probes the relationship between modern science and religious belief considering their points of conflict and their many points of similarity Is the real God of creationism the master clockmaker who sets the world's mechanism on a perfectly enduring course or a miraculous presence who continually intervenes in and alters the world we know Are science and faith or evolution and creation really in conflict at all Expanding the parameters of a lively and urgent debate God and Design considers how perennial questions of origin continue to fascinate and disturb us      The Design Argument Elliott Sober, 2018-11-29 This Element analyzes the various forms that design arguments for the existence of God can take but the main focus is on two such arguments The first concerns the complex adaptive features that organisms have Creationists who advance this argument contend that evolution by natural selection cannot be the right explanation The second design argument the argument from fine tuning begins with the fact that life could not exist in our universe if the constants found in the laws of physics had values that differed more than a little from their actual values Since probability is the main analytical tool used the Element provides a primer on probability theory      A Critique of Design-arguments Lewis Ezra Hicks, 1883
